SUBJECT: Report 04, Weekly Construction Update for Week Ending 04/23/2016

Construction that has occurred over the past week is as follows:

- Earth excavation work was performed between sta.213+00 to 225+00. This work included the cutting down of slopes, the building up of slopes and the beginning of the north abutment cone construction.
- Rains and threat of rain stopped earthwork for the last half of the week.

Construction that is currently planned for this coming week is as follows:

- The borrow pit will be stripped of vegetation and topsoil. Furnished excavation material will soon need to begin coming from the borrow pit.
- Earthwork for slopes, ditches and the north abutment cone will continue.
- Temporary erosion controls will be installed. Perimeter erosion barrier, temporary ditch checks and temporary erosion control seeding is planned.

The project is being overseen by the Peoria County Highway Department. The current estimated completion date is October 2016. Weather and unforeseen conditions will always affect the schedule.
