SUBJECT: Report 18, Weekly Construction Update for Week Ending 09/03/2016

Construction that has occurred over the past week is as follows:

- The construction of the concrete curb & gutter was completed.
- Subbase aggregate of the roadway continued to be hauled in, graded and compacted. The finish grading of the aggregate began on Thursday.
- Earthwork has resumed, which includes finishing the slopes behind the new curb & gutter.

Construction that is currently planned for this coming week is as follows:

- Monday, September 5 is Labor Day holiday and nobody is scheduled to work on that day.
- Earthwork will continue with the effort of getting the slopes to final grade, curbs backfilled and the shoulder subgrade cut to grade and compacted.
- Road work will continue. The subbase aggregate will be finished and graded to final elevation.
- The bituminous Bridge Approach Connectors might be installed at each end of the bridge, once the subbase aggregate work has been completed.

The project is being overseen by the Peoria County Highway Department. The current estimated completion date is October 2016. Weather and unforeseen conditions will always affect the schedule.
