**SUBJECT:** Report 20, Weekly Construction Update for Week Ending 09/17/2016

---

Construction that has occurred over the past week is as follows:

- End sections were installed onto the 18" diameter storm sewers. The riprap basins were also constructed at each storm sewer outfall.
- Additional riprap was installed around each corner of the bridge.
- Weeds and temporary seeding was mowed off of the slopes of the south half of the jobsite. This needs to be done prior to topsoil grading and seeding.
- Installation and final grading of the roadway aggregate was completed, in preparation for paving operations. Paving had been planned for Friday, but persistent rain forecasts cancelled those plans.

Construction that is currently planned for this coming week is as follows:

- Paving work is likely.
- Shoulder work will begin once the paving work is complete.

The project is being overseen by the Peoria County Highway Department. The current estimated completion date is October 2016. Weather and unforeseen conditions will always affect the schedule.
