**SUBJECT:** Report 23, Weekly Construction Update for Week Ending 10/08/2016

---

Construction that has occurred over the past week is as follows:

- Paving was completed on Tuesday. The second lift of HMA binder was placed on Monday and then the HMA surface was placed on Tuesday.
- The shoulders of the new roadway were excavated and graded on Wednesday.
- Heavy rains shut down work on Thursday.
- The aggregate shoulders were mostly installed on Friday. They will be finished early next week.

Construction that is currently planned for this coming week is as follows:

- Construction of the aggregate shoulders will be completed.
- The driveway entrances in the jobsite will be graded to match up to the new pavement. Crushed white rock will be used, as directed in the Plans.
- Guardrail installation is planned to take place on Wednesday and may last through Thursday.
- Bridge deck grooving is currently being scheduled, but a day has yet to be determined for that work to occur.

The project is being overseen by the Peoria County Highway Department. The current estimated completion date is October 2016. Weather and unforeseen conditions will always affect the schedule.
