**SUBJECT:** Lancaster Road Bridge Replacement

---

Stark Excavating is pouring concrete gutter this week along the edge of the new roadway and completing placement of riprap at the bridge.

The gravel base for the road will be final graded next week, with paving operations possible at the end of next week and continuing into the following week. Once the asphalt base is completed, topsoil will be placed on the slopes and final earth grading operations will occur before the asphalt surface is installed.

The deadline for work completion is Friday, November 17, and the project is on pace to be completed on time.

During construction, Lancaster Road will remain CLOSED to through traffic. However, residents will still have access to their homes and property. With the existing roadway removed access will be maintained on gravel until the new pavement is installed later this year.

Thank you in advance for your patience and cooperation during this project.
