**SUBJECT:** Lancaster Road Bridge Replacement

---

Stark Excavating and their subcontractors have completed the preparation work that was needed to get the utilities relocated. Stark is planning to begin working on the roadway and bridge beginning in March of 2017.

Before March, utility companies will be working to relocate gas, electric, and communication lines that are in conflict with the proposed locations of the roadway and bridge. The water main will be relocated in the spring with the roadway construction.

During the winter, Lancaster Road will remain CLOSED to through traffic. However, residents will still have access to their homes and property.
