SUBJECT: Report 08, Weekly Construction Update for Week Ending 05/13/2017

Construction that has occurred over the past week is as follows:

- All of the steel bridge girders and diaphragms (cross braces) were set in place on the new bridge abutments on Thursday.
- Final tightening of the diaphragm bolts was going to take place on Friday, but it was discovered that the bolts were ½" too long and could not be fully tightened. New bolts were ordered and will be installed next week once they arrive.

Construction that is currently planned for this coming week is as follows:

- New bolts will be installed and fully tightened.
- Construction of the bridge deck forms will begin.
- Tree removal debris might be disposed of.

The project is being overseen by the Peoria County Highway Department. The current estimated completion date is October 2017. Weather and unforeseen conditions will always affect the schedule.
