

PEORIA COUNTY, ILLINOIS

MONTHLY FINANCIAL REPORT

January 2013

Revenue information current as of: January 10, 2013

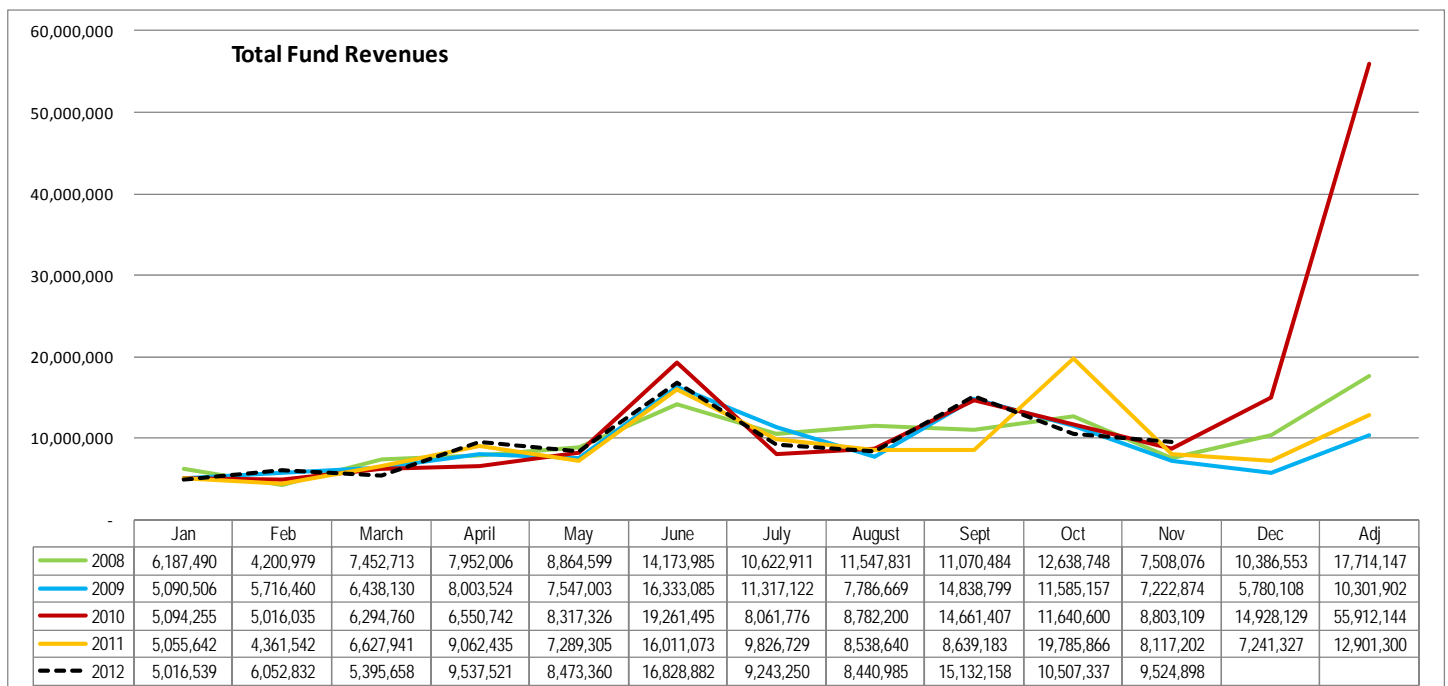

Year-to-date revenues, expenditures, and cash flow as of: November 30, 2012

Overall Fund Revenues

As of November 30, 2012, overall fund revenues are \$104,153,421. This is an increase of \$837,862 (+0.8%) from the same time last year.

Other expense reimbursements are significantly higher due to a reimbursement from Lakeview Museum for the Peoria Riverfront Museum project. State Income Tax is up by \$348,647 in FY 2012 (+13.7%). Supplementary sales taxes are up 8.0% due to a large one-time sales use transaction in April 2012. Federal grants are up \$620,292 (+103.3%) which is notable since this revenues experienced a decline from last year for most of FY 2012. State grants are up \$216,862 (+7.7%) from last year. Sealcoating revenue is up \$1,170,341 (+289.9%) from this time last year. However, this is attributed to changes in accounting procedures that require less yearend adjustments. The employer portion of health fees is up \$275,570, the surcharge for CMS-wireless is up \$146,339, revenue stamp revenues are up \$173,447, fees and charges are up \$184,429 (+2.8%), and miscellaneous fees for services are up \$197,336. The clear-win grant brought in an additional \$331,182, and an additional \$340,340 in federal detention charges and an additional \$142,430 took place in connection to the taking of bond fees. Some items were still outstanding related to Bel-Wood's contractual allowances and this item was still being adjusted at the time of this report. Other notable increases in revenue are noted on the following page.

While the private pay portion of revenues are up for Bel-Wood Nursing Home, the public aid and Medicare allowances, and Medicare fees, are down nearly \$2.8 million year to date. This continues to be an area of concern for the County's finances. The County issued \$2,000,000 in bonds for Wilhelm Bridge that appeared as revenue since it is in a governmental fund. This transaction did not take place in FY 2012 and has skewed the year-to-year comparison. Construction cost reimbursement is down from last year, but this is attributed to significant reimbursement in FY 2011. Third party service fees are down \$414,881, but this is down due to a timing issue that should balance itself out next month. Miscellaneous revenues are down in comparison to FY 2011 due to a large one-time transaction that took place last year. Donations / charitable contributions are down from FY 2011 due to a smaller amount received in connection to the PRM parking garage. State payments for unincorporated sales taxes are lagging slightly in comparison to FY 2011 payments. This accounts for a \$281,148 (-21.4%) decrease from FY 2011. Other declines in revenue can be found on the following page.

Year End Totals	2008	2009	2010	2011	YTD 2012
	130,320,522	117,961,339	173,323,978	123,458,185	104,153,421

Overall Fund Revenues

Total fund revenues will vary each year and revenues are not always collected in the same exact timeframe each year. These revenue figures must be analyzed in conjunction with total fund expenditures and total fund cash flow to get a clearer picture of the situation. Capital projects will skew the outlook on revenues for total funds. Other financing sources via debt issuance will show up as revenue in our financial software. This will lead to spikes in various months.

Revenues that have seen notable growth when examining all County Funds this year include:

Revenue Source		FY 2011	FY 2012	Increase	% Growth

General Fund Revenues

As of November 30, 2012, General Fund year to date revenues were at \$37,271,136, an increase of \$3,809,372 (+11.4%) when compared to November 30, 2011.

Much of this is due to the change in the accounting for the supplemental and public safety sales taxes. This was discussed at the Finance Committee when preparing for the FY 2012 budget. These revenues often fund debt service or specific projects with expenditures in non-operating funds and involve predetermined dollar amounts. Past practice was to allocate the earmarked revenue streams over a percentage basis. The problem with this approach is that an excess of funds would often be sitting in a debt service reserve as opposed to being utilized for its original intent. The revenues are now going into the General Fund and when payments are due, a transfer for the predetermined dollar amount took place in order to allocate the exact amount needed to fund the expenditure. The remainder stays in the General Fund either for general purposes in the case of the supplemental sales tax or for public safety purposes in relation to the public safety tax. Additional monies can be transferred based on Board action.

State Income tax revenues are up \$348,647 (+13.2%), but it should be noted that the growth rate has been declining throughout the year. Federal Detention charges are up \$340,340 (+79.3%) and the taking of the bond fees are up \$142,430 (+101.1%), this is due to increases in fees / charges associated with these programs. Fees and charges up after being down for the bulk of the year (+6.2%, \$235,879) and miscellaneous fees for services are up \$127,586 (+51.2%). This has been an area of steady decline for quite some time, but it has rebounded in recent months. Revenue stamp revenue continues to be strong and it is up \$173,447 (+26.5%). Building / zoning permits are up \$92,517 (+29.9%), telephone usage fees are up \$87,340 (+150.4%), and the animal protection contract revenue is up \$65,664 (+29.1%).

State payments for unincorporated sales taxes are lagging slightly in comparison to FY 2011 payments. This accounts for a \$281,148 (-21.4%) decrease from FY 2011. State grants are down \$94,222 (-15.7%) and Federal grants are down \$106,058 (-57.4%). The corporate personal property replacement tax is down \$64,992 (-2.3%), which is notable since this revenue source had significant growth throughout most of FY 2012. Miscellaneous revenues are down \$92,075 (-61.4%), asset disposal proceeds are down \$44,744 (-59.3%), and the children's waiting room fee is down \$42,655 (-100%) from last year.

Year End Totals	2008	2009	2010	2011	YTD 2012
	46,105,592	41,162,671	47,128,038	39,377,369	37,271,136

General Fund Revenues

Revenues that have seen notable growth in the General Fund this year include:

Revenue Source		FY 2011	FY 2012	Increase	% Growth
33944	1/4% PUBLIC SAFETY TAX	1,827,902	3,438,341	1,610,439	88.1%

Property Taxes

The Peoria County Board has provided consistent direction to County staff over the years to keep the property tax rate in check. Generally, growth in the assessed valuation increases the County's property tax receipts without having to raise the property tax rates.

FY 2012 revenues stem from the 2011 tax levy. Property taxes are the most predictable source of tax revenue at the County's disposal. The revenue stream can be accurately predicted at the time of the levy through the combination of the tax rate, estimated equalized assessed value, and anticipated growth within that tax base.

Property tax collections spike in connection with tax bill payments due in June and September of each year.

The property tax receipts collected through November 2012 total \$25,353,744. This is \$55,588 (0.2%) more than the amount collected through November 2011. The combination of a flat property tax rate and an overall declining equalized assessed valuation and new construction seemed to have an offsetting effect in 2012.

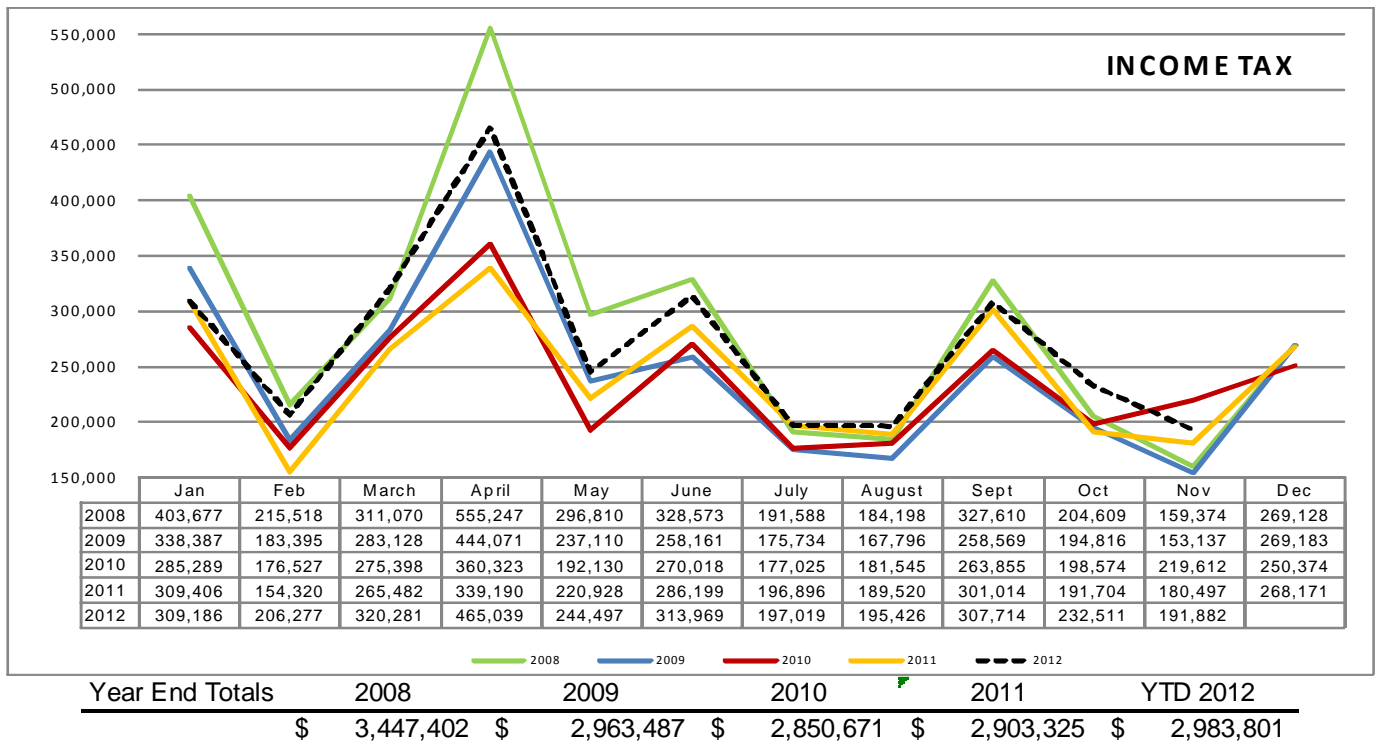

Year End Totals	2008	2009	2010	2011	YTD 2012
	24,345,461	25,352,885	25,792,277	26,169,796	25,353,744

Peoria County levies a property tax on all property within the County, including that within municipalities, for services provided throughout the County. These taxes are then deposited into various governmental and proprietary funds, according to the statutory limits of those funds. For example, the maximum tax rate in the General Fund is 25.00¢ per \$100 of assessed valuation, while the maximum rate in the County Highway fund is 10.00¢. Other jurisdictions within the County have the ability to levy property taxes, including library districts, school districts, and municipalities. Property tax revenues are based on the assessed valuation of real and personal property. Exemptions are available for certain senior citizens, as well as government bodies in certain cases. Once a property is assessed, the Board of Review may adjust certain valuations.

Income Tax

Income tax revenues have a delayed response to the economy. Reductions in income taxes appear a few months into an economic recession. Reductions in income tax revenue took place from 2001-2003, yearly growth took place from 2004-2008, and another set of reductions began in 2009-2010. FY 2012 income tax revenue depends on not only the economy, but the impact that the changes in tax rates may have on local governments. A description of the tax rates can be found below.

The amount of income tax received by Peoria County through November 2012 is \$2,983,801. This amount is \$348,647 (or 13.2%) higher than the amount received at this time last year. The County witnessed strong growth in income tax revenue from February to June 2012, but the growth was somewhat flat from July to September 2012. Strong October income tax figures were followed by lackluster November figures. Income taxes have been one of the areas of notable revenue growth during 2012.

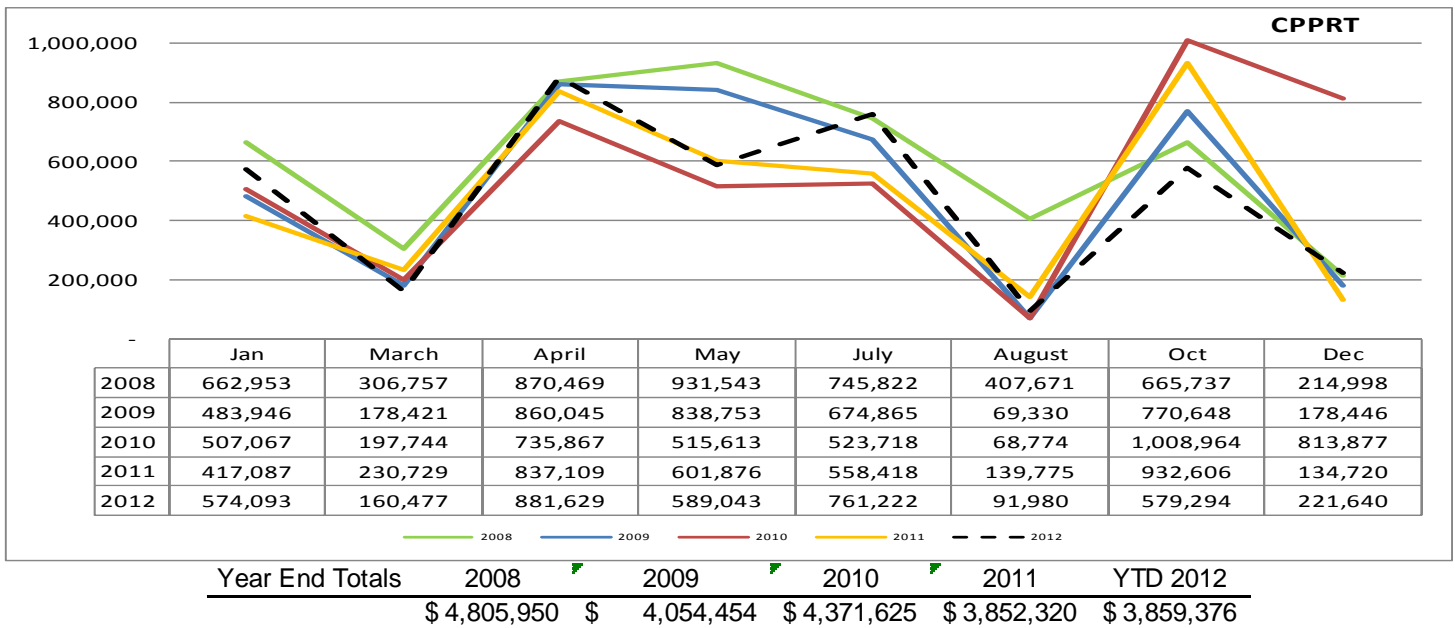

The Illinois Income Tax is imposed on every individual, corporation, trust, and estate earning or receiving income in Illinois. The tax is calculated by multiplying net income by a flat rate. Effective January 1, 2011, the current rate is 5% of net income on individuals and 7% on corporations. The local government distributive fund (LGDF), where Peoria County receives income tax revenue, is based on 6% of the net revenue from individuals and 6.86% of the net revenue from corporations. Prior to January 1, 2011, the tax rates were 3% on individuals, 4.8% on corporations, and 10% of the proceeds went into the LGDF.

Corporate Personal Property Replacement Tax

Fiscal Year 2012 CPPRT revenues are at \$3,859,376 through early December 2012. This is up \$7,057 (0.2%) from last year at this time. The County received its eighth and final payment of the year. It ended the year flat when compared to last year, this is disappointing because the County was receiving a significant increase in revenues until the October 2012 payment. This decrease led to a sizable drop in year to date totals, which ultimately totaled roughly the same amount as FY 2011.

The decrease in October 2012, as noted in the past, was due in large part to a significant reduction soon to occur in CPPRT pool. This last payment appears to be evidence of the effect of this reduction.

The following is a recap the situation regarding the reduction in the CPPRT pool. The FY 2013 allocations are estimated at \$1.054 billion. This is a decrease of 14.7% or \$182 million from the FY 12 allocations. The primary reason for the decrease is due to statutory requirements. The FY 2012 allocation was increased by \$90.5 million because the state is statutorily required every fiscal year to transfer any unpaid Replacement Tax refund monies from the refund fund to the Personal Property Tax Replacement fund. Since the State did not pay Replacement Tax refunds during FY 2010 and FY 2011, the transfer amounts during FY 2011 and FY 2012 were an increase to the Personal Property Tax Replacement fund. In FY 2012, the State paid all required Replacement Tax refunds to the business taxpayers by June 30, 2012. This resulted in a deficit in the Replacement Tax refund fund that must now be transferred out of the Personal Property Tax Replacement fund. This amount is \$91.2 million. In short, local governments received monies in prior years that now must be repaid pursuant to state statute.

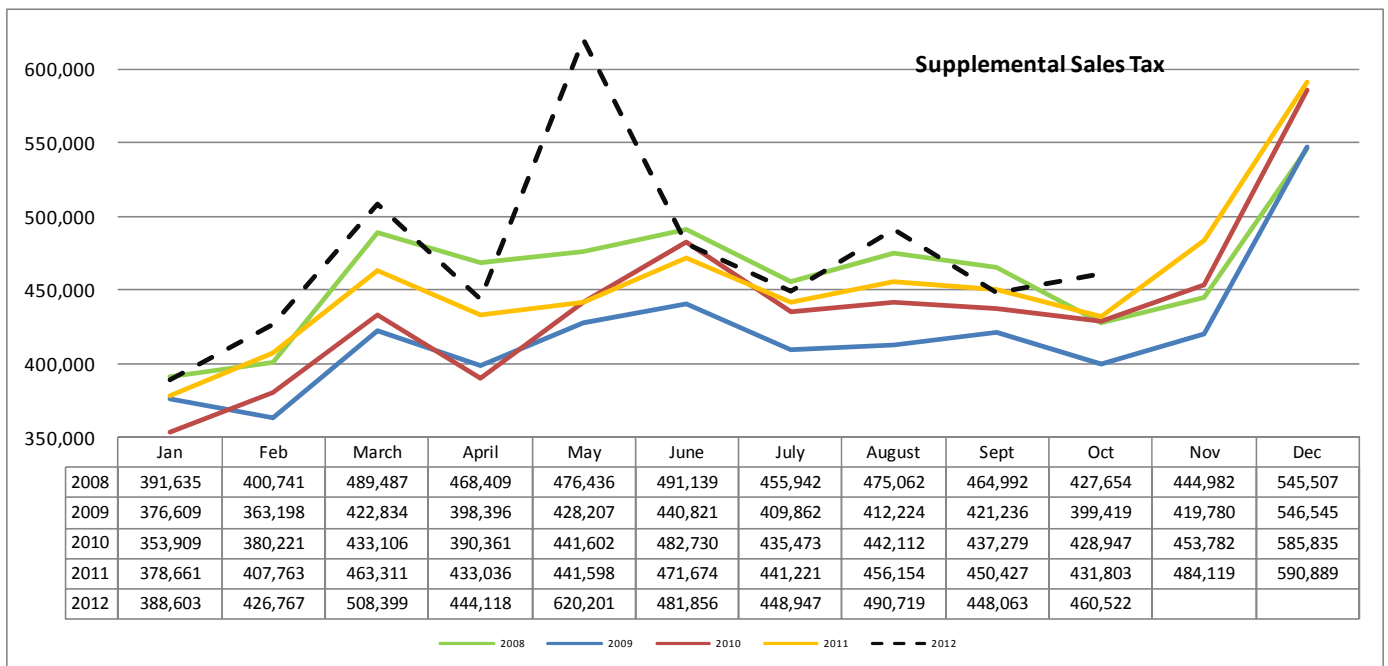

Replacement taxes are revenues collected by the State of Illinois and paid to local governments to replace money that was lost by local governments when their powers to impose personal property taxes on corporations, partnerships, and other business entities were taken away. These taxes resulted when the new Illinois Constitution directed the legislature to abolish business personal property taxes and replace the revenue lost by local government units and school districts. In 1979, a law was enacted to provide for statewide taxes to replace the monies lost to local governments. Corporations pay a 2.5 percent tax on income; partnerships, trusts, and S corporations pay a 1.5 percent tax on income; and public utilities pay a 0.8 percent tax on invested capital. The State of Illinois collects the whole sum received; 51.65% goes to Cook County, while 48.35% goes to "downstate" counties. The downstate portion multiplied by the rate allocated to Peoria County (currently 0.6644568) is divided by 100 in order to derive the amount due to the County. This payment is made eight times a year: Jul, Aug, Oct, Dec, Jan, Mar, Apr, and May.

Supplemental Sales Tax

Supplemental sales taxes reflect general merchandise sales across Peoria County. While these taxes are not applicable to groceries and pharmaceuticals, they are applicable to licensed and titled goods such as automobiles.

Year to date supplemental sales tax revenues (through October 2012) are \$4,718,194. This is an increase of \$342,547 (+7.8%) over this time in FY 2011. Sales taxes returned to normal levels after the spike that occurred due to a one-time transaction in April 2012 (reflected in May's receipts). June and July 2012 witnessed small gains over the previous year. The August payment saw an upswing in revenues, reminiscent of the receipts from earlier this year. Overall, the sales tax trends have been favorable through FY 2012. While the dollar amount continues to grow over FY 2011, the percentage of growth continues to drop as the effects of April 2012 transaction dilutes over the year.

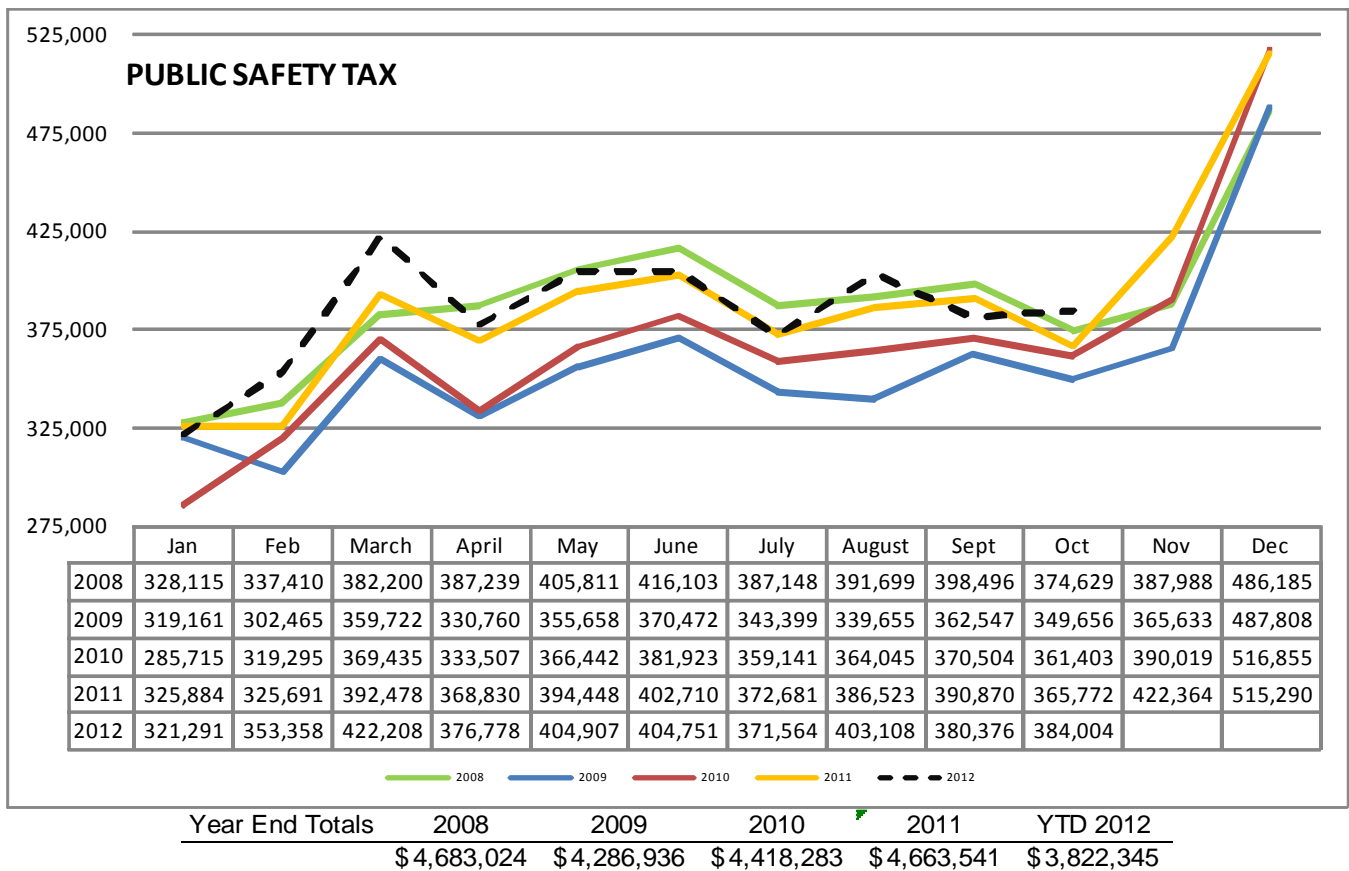

Year End Totals	2008	2009	2010	2011	2012 YTD
	\$ 5,531,986	\$ 5,039,130	\$ 5,265,357	\$ 5,450,655	\$ 4,718,194

The Supplemental Sales Tax, also known as the Countywide Sales Tax, is a 0.25% tax on goods purchase throughout Peoria County. These revenues are administered and distributed by the State of Illinois Department of Revenue. There is generally a lag of a few months in this revenue stream from the date of purchase to the time it is reported, collected, and ultimately distributed back to the jurisdiction where the sale occurred.

Public Safety Sales Tax

The Public Safety Sales Tax is a 0.25% tax on applicable goods purchased within Peoria County. Licensed and titled goods are exempt from this tax, so this revenue stream coincides with the sale of general merchandise. This sales tax has been recovering since the recession in 2008 first hit. Unlike other tax streams, such as income or property tax, sales tax is very elastic with the local economy. Luckily, things have been improving steadily since late 2008.

The County has received \$3,822,345 through October 2012, which is a 2.6% increase compared to this time in FY 2011. Public Safety sales tax figures have cooled down from earlier in the year. It was originally estimated that this revenue source would grow 3% to 4%, this is still attainable through if sales increase during the holiday shopping season.

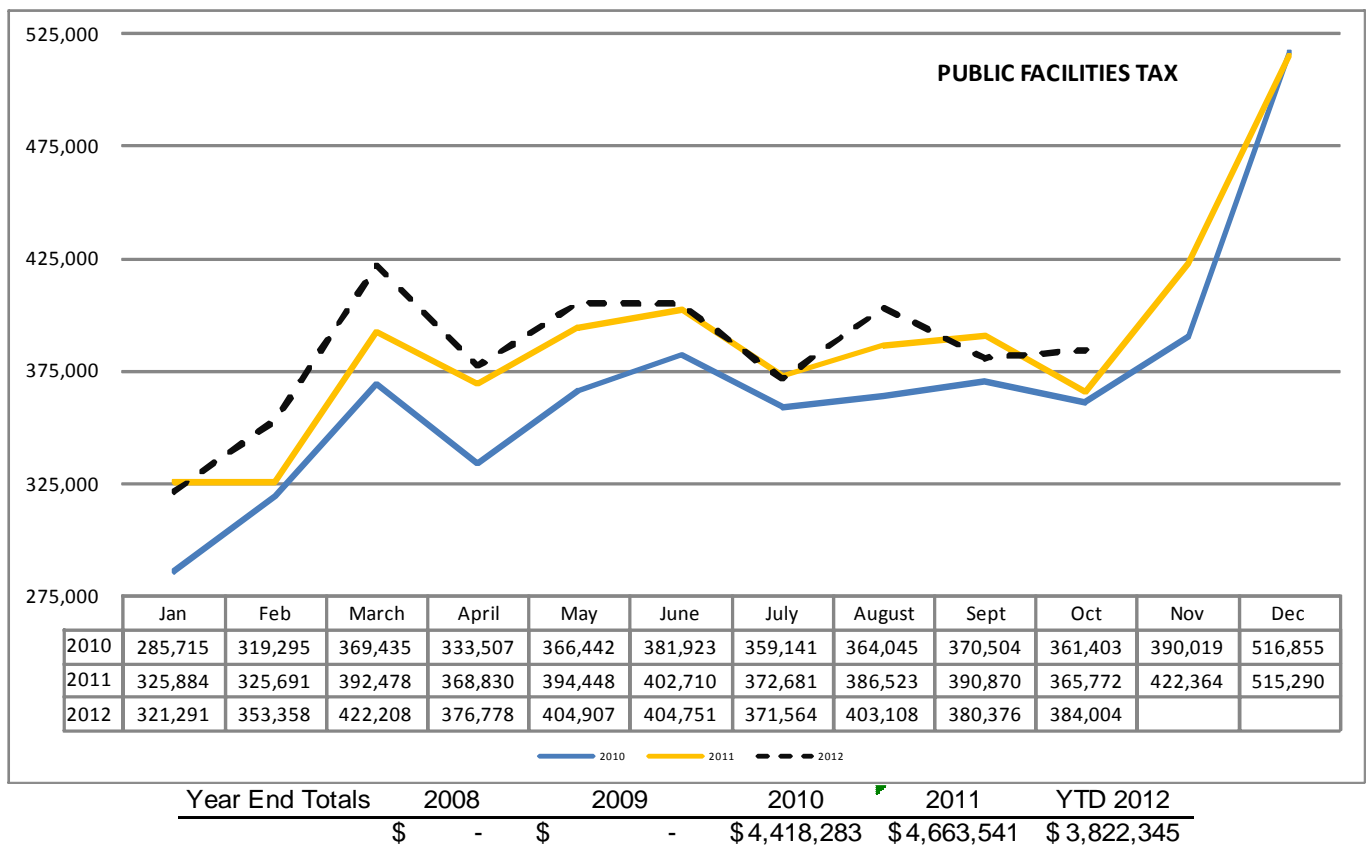

In November 1996, Peoria County voters passed a Public Safety Sales Tax of 0.25% on all tangible personal property sold for retail in the County. Illinois state statute grants permission for counties to impose this tax in 0.25% increments. The tax was originally instituted to help cover the cost of the jail expansion, the construction of a new juvenile detention center, and an outdoor warning system for areas of the county outside of Peoria City's warning system. Once these expenses were covered, the County could use the remaining tax revenue on public safety related expenditures. Public safety expenditures in Peoria County are limited to the Sheriff, Emergency Management Agency, Coroner, and Juvenile Detention.

Public Facilities Sales Tax

The Public Facilities Sales Tax is a 0.25% tax on applicable goods purchased within Peoria County. Licensed and titled goods are exempt from this tax, so this revenue stream coincides with the sale of general merchandise. While this tax stream is relatively new, first collected on January 1, 2010, it is at the same rate and applicable on the same goods as the public safety sales tax which can provide a further historical perspective on collections. Unlike other tax streams, such as income or property tax, sales tax is very elastic with the local economy.

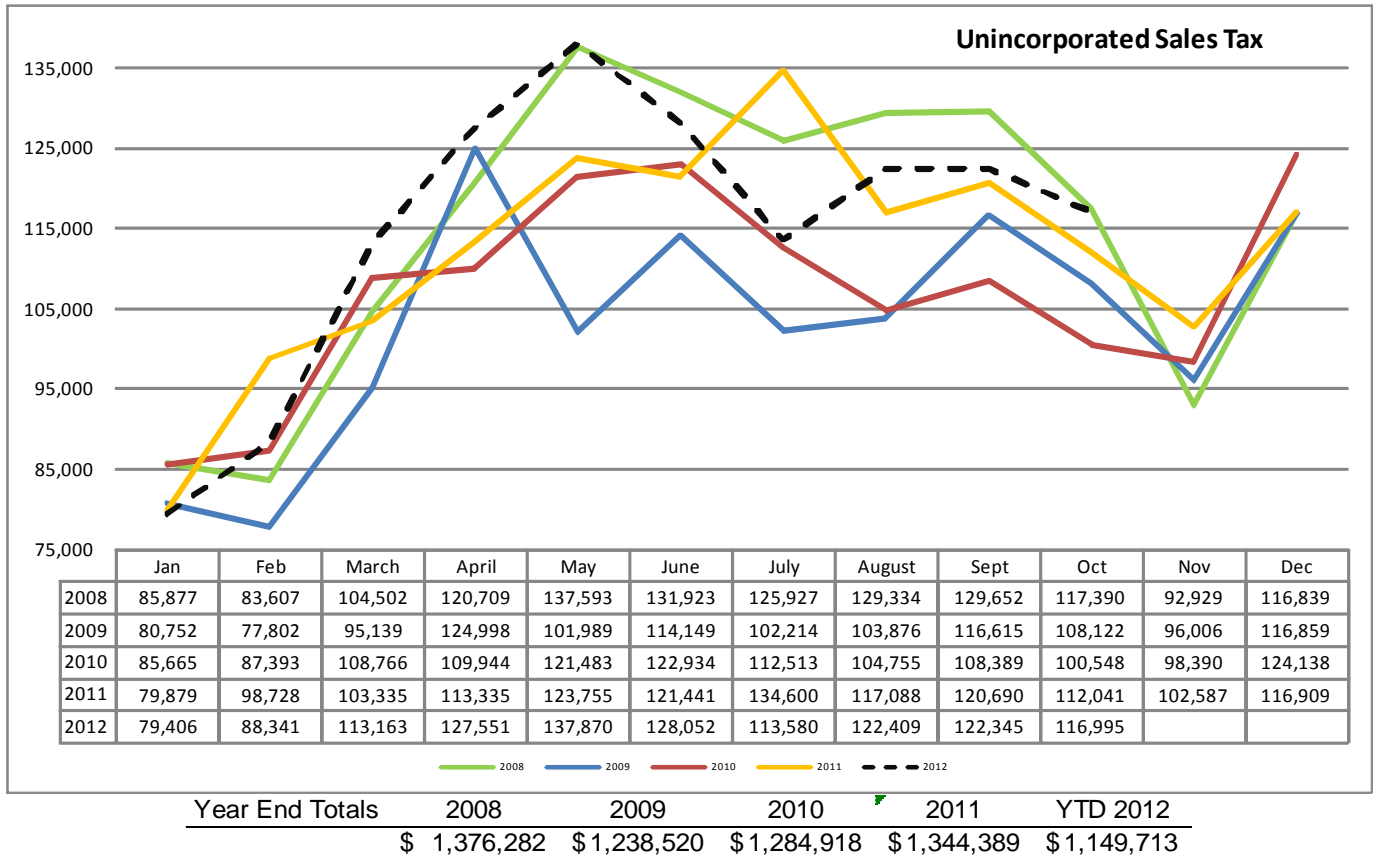

The County has received \$3,822,345 through October 2012, which is a 2.6% increase compared to this time in FY 2011. Public facilities tax revenues continue to cool down from the growth witnessed earlier in the year, but it is still above FY 2011 totals through the month of October 2011. It was estimated that the County would see 3% to 4% growth in sales tax in 2012, so the actual numbers are starting to fall behind initial estimates. However, these numbers are before the holiday shopping season, so that should be taken into account during the last two months of the year.

In April 2009, Peoria County voters approved through a referendum to use a 1/4¢ public facilities sales tax in Peoria County as a funding mechanism to build the Peoria Riverfront Museum. The bulk of the revenue generated by this sales tax will be used to pay the debt service on the bonds issued to fund construction of the museum. Any revenues in excess of the debt service are available to fund other capital projects at Peoria County or could possibly be granted to other local governments for their capital projects in an effort to lessen their borrowing requirements.

Unincorporated Sales Tax

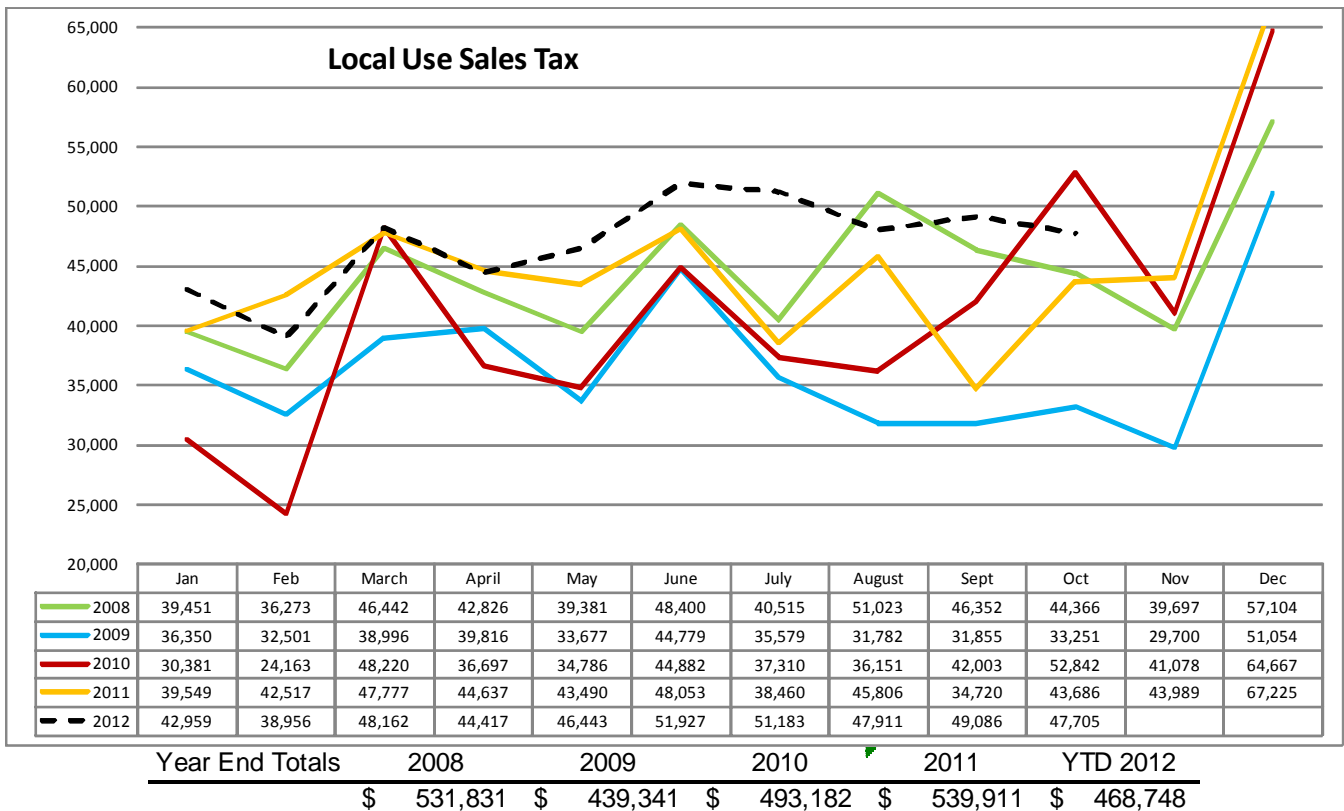

Unincorporated sales tax is collected at a rate of 1.25% on goods purchased in unincorporated areas of Peoria County. This sales tax revenue is similar to all other sales taxes in the economy in that it has been on the rebound since late 2008 when the economy was hit by a recession. The year to date total received is \$1,149,713, which is \$24,820 (+2.2%) more than last year at this time. There is slight growth from last year, which seems to correspond with other local sales taxes (less the supplemental sales tax which saw a large one time use tax transaction).

The Unincorporated Sales Tax, also known as the County Sales Tax, is a 1.25% tax on goods purchase throughout unincorporated Peoria County. These revenues are administered and distributed by the State of Illinois Department of Revenue. There is generally a lag of a few months in this revenue stream from the date of purchase to the time it is reported, collected, and ultimately distributed back to the jurisdiction where the sale was conducted.

Local Use Tax

The local sales use tax has been growing steadily since late 2008 when the first effects of the recent recession were felt. As of October 2012, the County has collected \$468,748, an increase of \$40,051 (+9.3%) over figures through October 2012. Local sales use taxes are most often associated with online purchases.

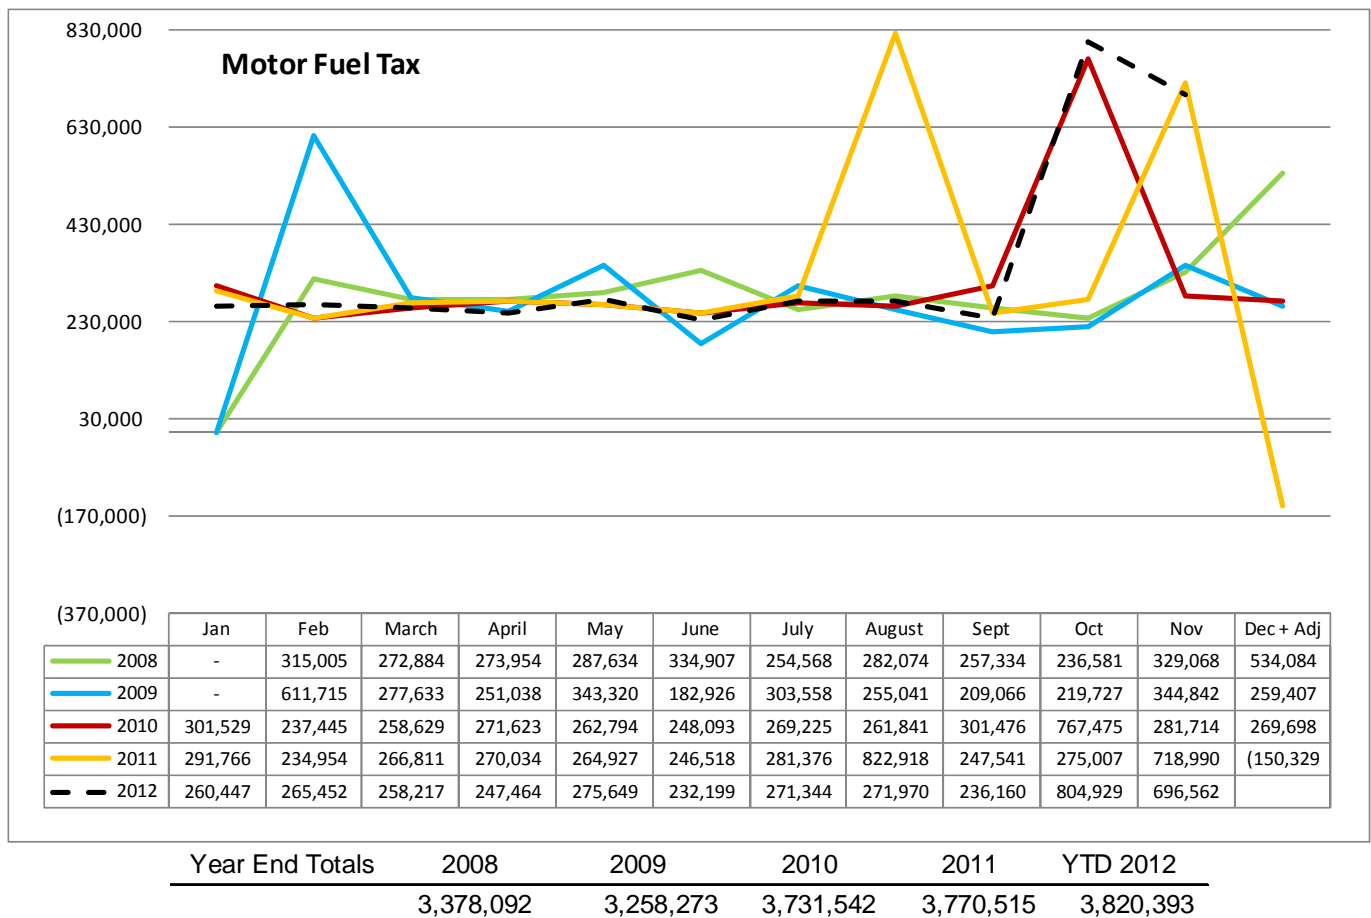

The Use Tax is a tax imposed on the privilege of using, in Illinois, any item of tangible personal property that is purchased anywhere at retail. This can occur when out-of-state vendors make retail sales to Illinois businesses or consumers, Illinois consumers purchase tangible personal property at retail from out-of-state, unregistered retailers for use in Illinois without paying tax to the retailer, or when Illinois businesses withdraw tangible personal property from their sales inventories for their own use. In this instance, at the time the item was purchased, the business did not pay tax to the vendor because it purchased the item for resale purposes. The use tax rate is 6.25 percent on purchases of general merchandise including automobiles and other items that must be titled or registered. The use tax rate is 1 percent on purchases of qualifying food, drugs, and medical appliances. Twenty percent of the collections for general merchandise and 100 percent of the collections on qualifying food, drugs, and medical appliances are returned to local governments.

Motor Fuel Taxes

Motor fuel tax (MFT) revenue is an important source of funding for building and maintaining county and township roads. Distributions are not as consistent with motor fuel taxes as with other revenue sources (such as sales taxes, which are attributed to a specific month when a transaction took place). Oftentimes there are "catch up months," which was the case in October 2010 and August 2011. These items are anomalies when making comparisons between fiscal years. However, the same bottom line can be analyzed at the fiscal year end. Motor fuel tax revenue is tied to a flat rate, so the price of fuel has no direct bearing on this revenue source. However, price levels influence fuel consumption levels, which are directly linked to the level of motor fuel tax revenue received by the County.

The County received \$3,820,393 in motor fuel taxes through November 2012. This is \$100,451 (-2.6%) less than this time in FY 2011. Throughout FY 2012, motor fuel tax revenues have been down consistently between 2% to 3% in comparison to the FY 2011.

Since October 1, 1977, Illinois has imposed a motor fuel use tax on fuel used by interstate commercial motor vehicles. Revenues collected from this tax help, in part, to build and maintain roads and highways. Peoria County receives an allotment for both county and township roads, which are accounted for in separate funds. However, for the purposes of this analysis, the two amounts have been combined. Currently, \$0.19/gallon of gasoline and \$0.215/gallon of diesel purchased goes into the State MFT fund which is later distributed to Peoria County.

Bel-Wood Financials

Bel-Wood Nursing Home is a large-scale, business-like operation that warrants additional analysis due to its size. A set of financial documents related to this facility is a discussion topic that appears before the Health Committee on a monthly basis. Those financial documents include financial statements such as a detailed balance sheet, income statement, and other pertinent financial information. This document can be obtained by downloading the Health Committee Board packets at the url listed at the bottom of this page.

This page gives a snapshot view of the Bel-Wood operations in the form of a Statement of Revenues, Expenses and Changes in Fund Net Assets. This information provides a history of Bel-Wood's financials from 2007 to the current month in 2012.

Bel-wood revenues should be examined in two separate categories: operating income and non-operating revenues. The operating income is in the top section of the following table and is accompanied by a chart on the next page. This chart removes property taxes; other non-operating income, such as interest; and any losses on the disposal of capital assets from the financial statement to provide a true reflection of how the facility is running on its own. There are some concerning trends occurring in terms of operating income and those are discussed in greater detail on the next page.

The non-operating revenues provide the additional funding for the facility (or more accurately for the new elder care facility known as Heddington Oaks) in the form of property taxes and other non-operating income. This money should be excluded from discussions involving Bel-Wood operations as it is set aside to make debt service payments on the bonds issued in FY 2011. However, these monies do contribute to the overall net assets of the Bel-Wood facility and while they are a component of the total, they need to be shown separately as in the table below.

<http://www.peoriacounty.org/countyboard/avcommittee/>

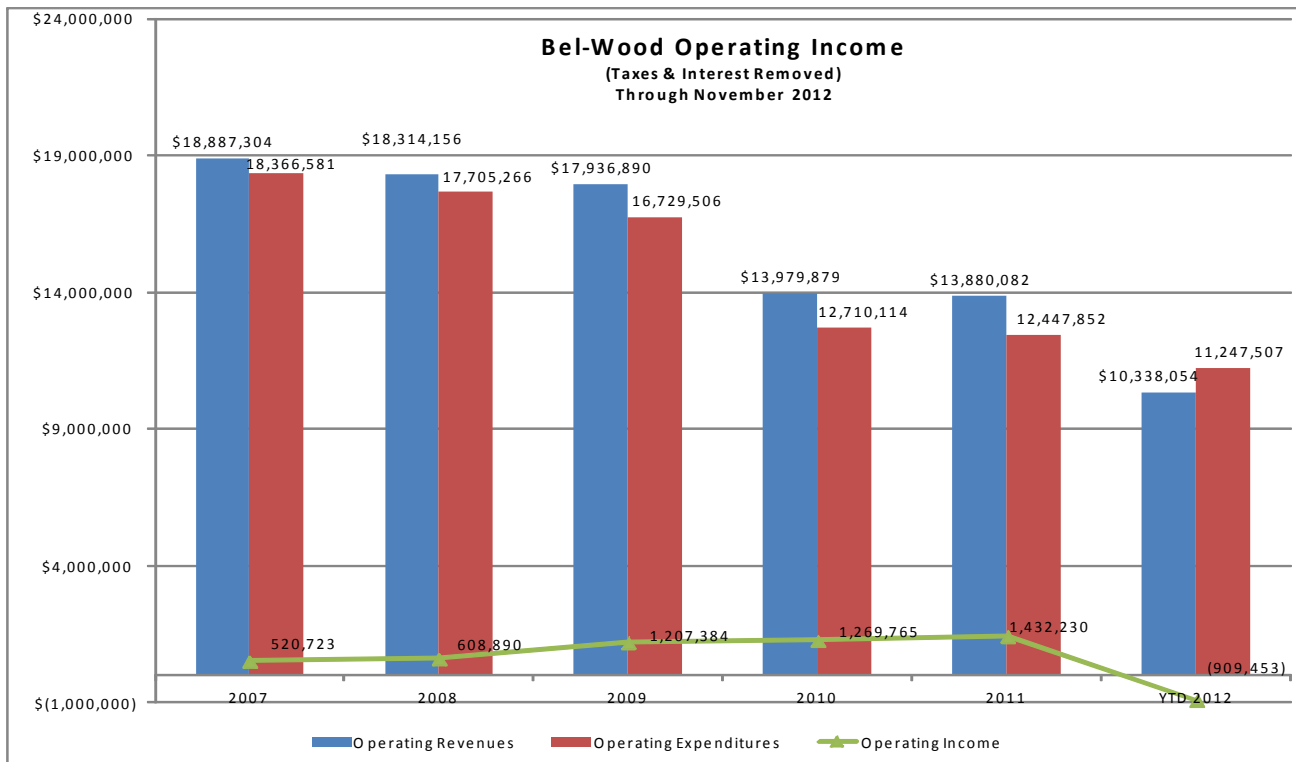

The following chart depicts the operating income of Bel-Wood Nursing Home with a five year history and the current year-to-date amount. These totals remove property taxes and interest from the revenues in order to provide more accurate data on how the facility functions on its own. Totals from FY 2007 to FY 2011 are derived from audited figures, and FY 2012 is based on the latest financial reports distributed to the County's Health Committee. Current year-to-date totals are accurate as of November 30, 2012.

Revenues and expenditures have been decreasing in tandem over the last several years, but recently they are not dropping at the same rate. The previous trend had expenditures dropping at a faster rate than revenues in a given year, resulting in greater operating income. In FY 2011, expenditures outpaced revenues and the level of operating income began to decline. This trend began in FY 2011 but was aided in large part by one-time adjustments related to both accounts receivable and payable from the State of Illinois. The trends heading into FY 2012 are a cause for concern at this point and adjustments will need to take place.

Bel-Wood Nursing Home's net operating income through November 2012 is (\$909,453). As mentioned in previous reports, there is a negative cash flow in the operating income at Bel-Wood. It is currently trending to be over (\$1,000,000) by the end of 2012.

Depreciation is considered an operating expense for an Enterprise Fund such as Bel-Wood. Depreciation is responsible for \$350,900 (38.6%) of the loss in net operating income. Nevertheless, this still results in a (\$558,553) net operating loss at the facility through eleven months.

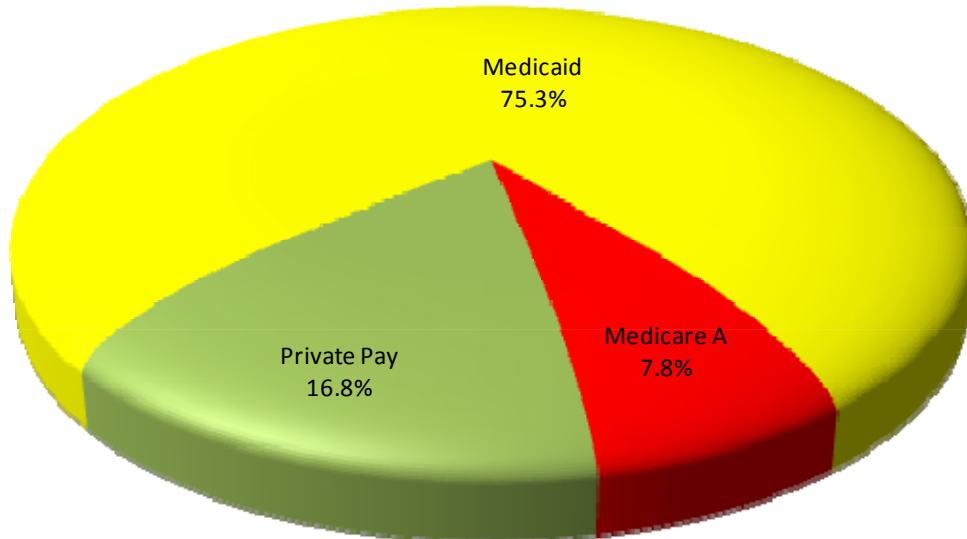

The \$677,235 in additional net assets shown in the table above is due to property taxes. However, the property taxes are earmarked for bond payments, so this cannot be included in a discussion of net operating income of the facility.

The Bel-Wood payer mix figures from December 2012 are shown below. Medicaid accounts for the majority of payers at 75.3%, while private pay and Medicare comprise for only 16.8% and 7.8% respectively.

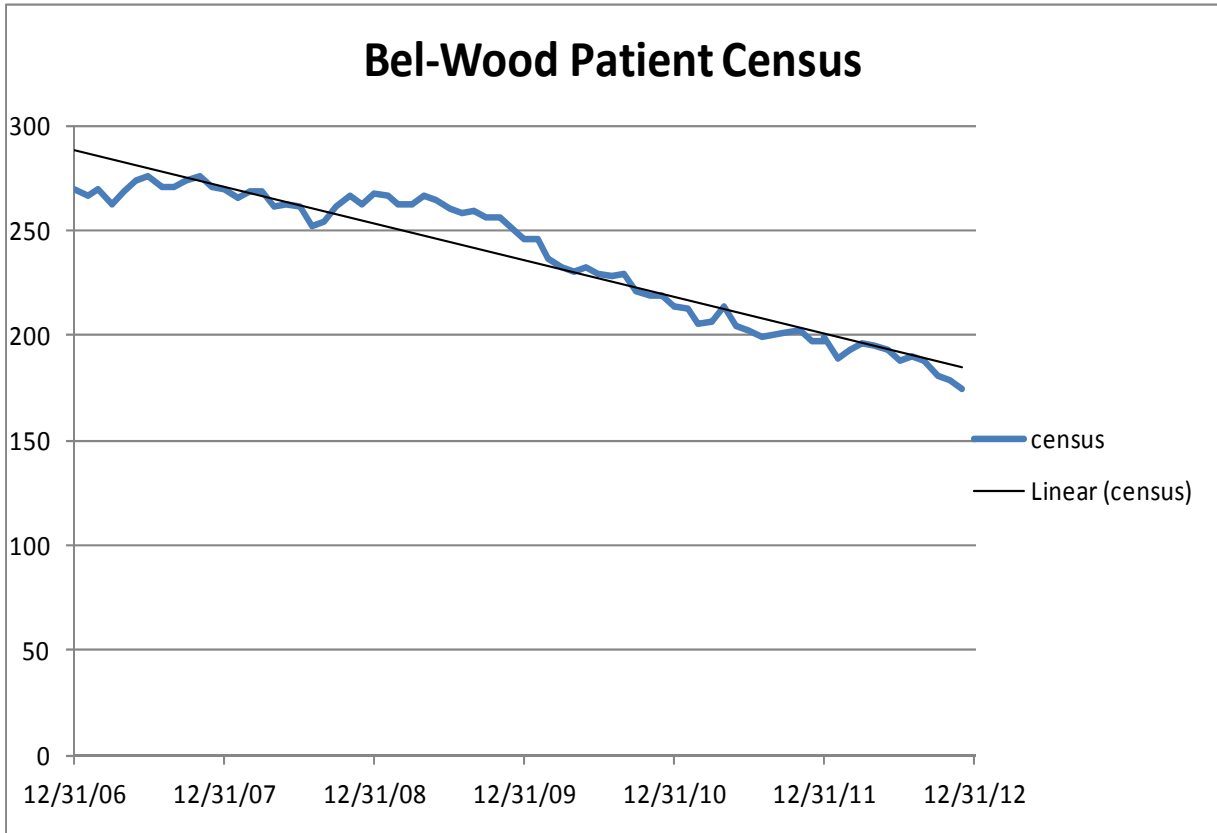

Bel-wood's census count is 174 days as of December 31, 2012. For comparison purposes, the census count was 270 days as of 12/31/2006. This drop in the census count correlates directly with the decrease in Bel-Wood revenues.

Bel-Wood Nursing Home Payer Mix December 2012

■ Medicaid
 ■ Medicare A
 ■ Private Pay

<u>Primary Payer</u>	<u>Days</u>	<u>%</u>
Medicaid	52,310	75.3%
Medicare A	5,435	7.8%
Private Pay	11,696	16.8%
Total	69,441	100.0%

Overall Fund Expenditures

As of November 30, 2012, year-to-date expenditures for all funds are currently \$129,121,315, up \$13,439,055 (+11.6%) from \$115,682,260 in November 2011.

An area of significant growth in November were contributions and grants. There was a \$3,502,114 increase in this line item from last year, \$3,000,000 of which was related to the pass-through of DCEO monies to the Peoria Riverfront Museum. Another area of sizable growth this year includes principal payments at \$3,290,000 which is tied to paying off the bonds from 2010 and 2011. These transactions led to sizable spike in overall expenditures, which will have a negative impact on overall cash flow in November 2012.

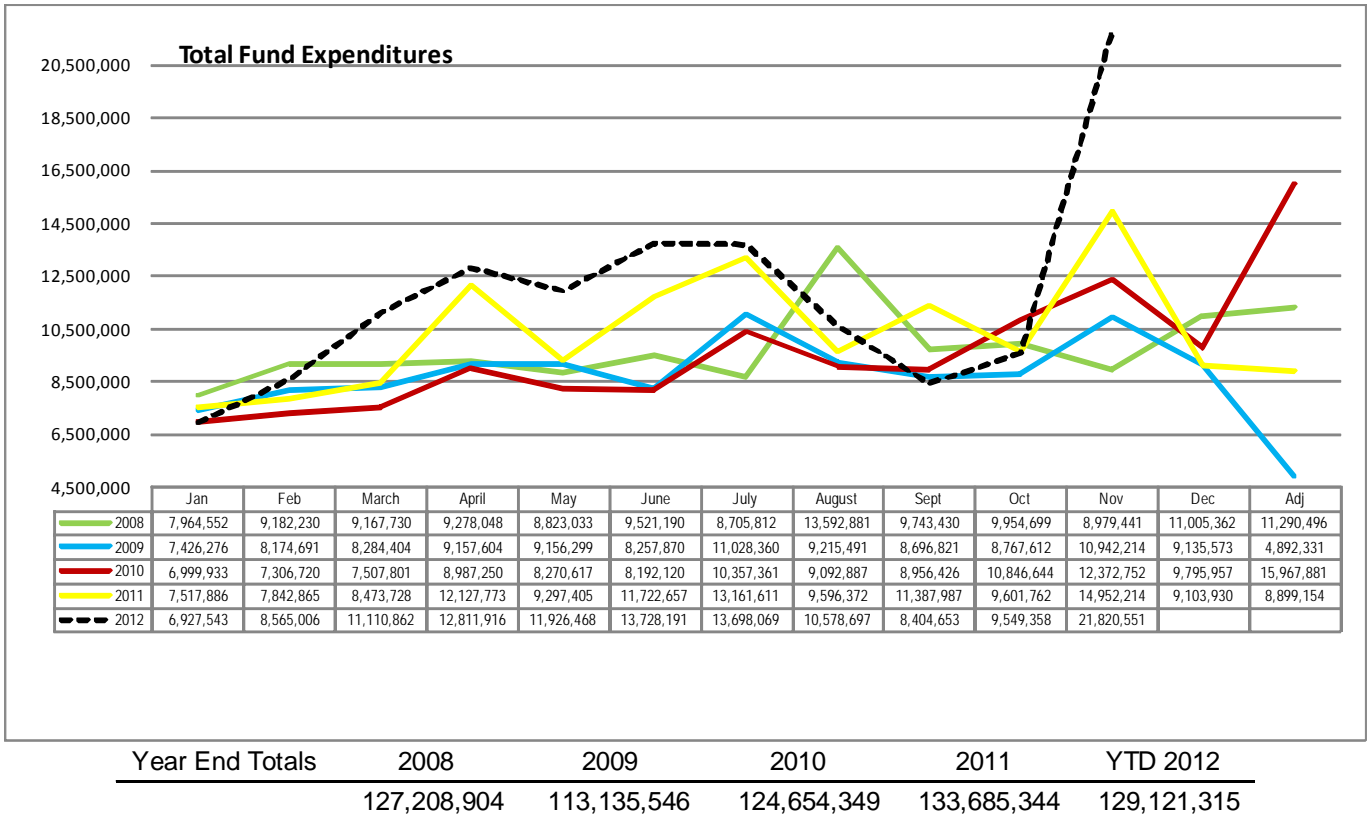

The following areas witnessed increased costs related to large scale capital projects include: building improvements at \$2,435,937, building construction at \$1,404,288, computer equipment at \$767,098, other equipment at \$503,580, subcontractor services at \$429,139, and radio and telephone equipment at \$120,674. Increased highway costs include: bridges and culverts expenses increased \$1,069,299, and highway repair at \$107,755.

The following personal costs have increased notably since last year: full-time employees are up \$1,052,388 (+3.2%), the IMRF contribution is up \$309,295, worker's compensation claims are up \$297,990, medical health benefit costs are up \$271,775, liability claims are up \$137,214, prescription drug claims are up \$122,991, FICA taxes are up \$109,055, and holiday pay is up \$106,158. Operating supplies and maintenance costs that increased include: gas and oil products at \$181,877, radio repair maintenance at \$129,275.

The following expenses also increased during the year: professional services at \$390,353, refunds on collected fees are up \$413,014, consultant services are up \$190,773, revenue stamps at \$153,308, and vehicles at \$103,864.

Expenditures related to land improvements are down \$856,335, and the purchase of land is down \$670,572 compared to this time last year. Operational supplies are down \$351,172, building repairs are down \$150,178, and utility expenses are down \$117,867. Road improvement expenditures are down \$444,388. Shared savings expenses are down a total of \$421,458. Building costs are down \$312,400, construction costs are down \$196,939, and engineering and architect fees are down \$130,613. Management expenses are down \$146,528.

General Fund Expenditures

As of November 30, 2012, FY 2012 General Fund expenditures are at \$38,311,028, an increase of \$2,564,840 (+7.2%) when compared to FY 2011.

Personnel costs comprise the lion share of the County' expenditures. These expenditures are up in FY 2012 as follows: full time employees are up \$1,186,195 (+6.7%), medical health benefits are up \$239,044 (+9.9%), overtime premium is up \$56,477 (+7.7%), election judges salaries are up \$89,394 (+313.4%), holiday pay is up \$75,643 (+41.6%), and elected official salaries are up \$57,877 (+6.8%). Outsourced medical services are up from last year (+\$193,170, +22.1%), revenue stamp purchases are up \$153,508 (+34.4%), radio repair / maintenance is up \$110,422 (+356.8%), and fleet maintenance expenses are up \$91,667 (+23.5%). Some items were not General Fund expenditures last year but appear this year, two such items were the transfer of monies for debt service (up \$1,486,226) and drugs related to the jail inmates (up \$88,056).

General Fund expenditures witnessing decline from FY 2011 include the transfer to the Juvenile Detention Center (-\$312,549, -29.2%), contributions and grants (-\$249,567, -73.9%), coordinator services (-\$150,724, -31.6%), building repairs (-\$141,674, -71.9%), and compensation adjustments (-\$50,345, -99.4%). Also, shared savings expenditures have been down thus far in the year by (-\$475,634).

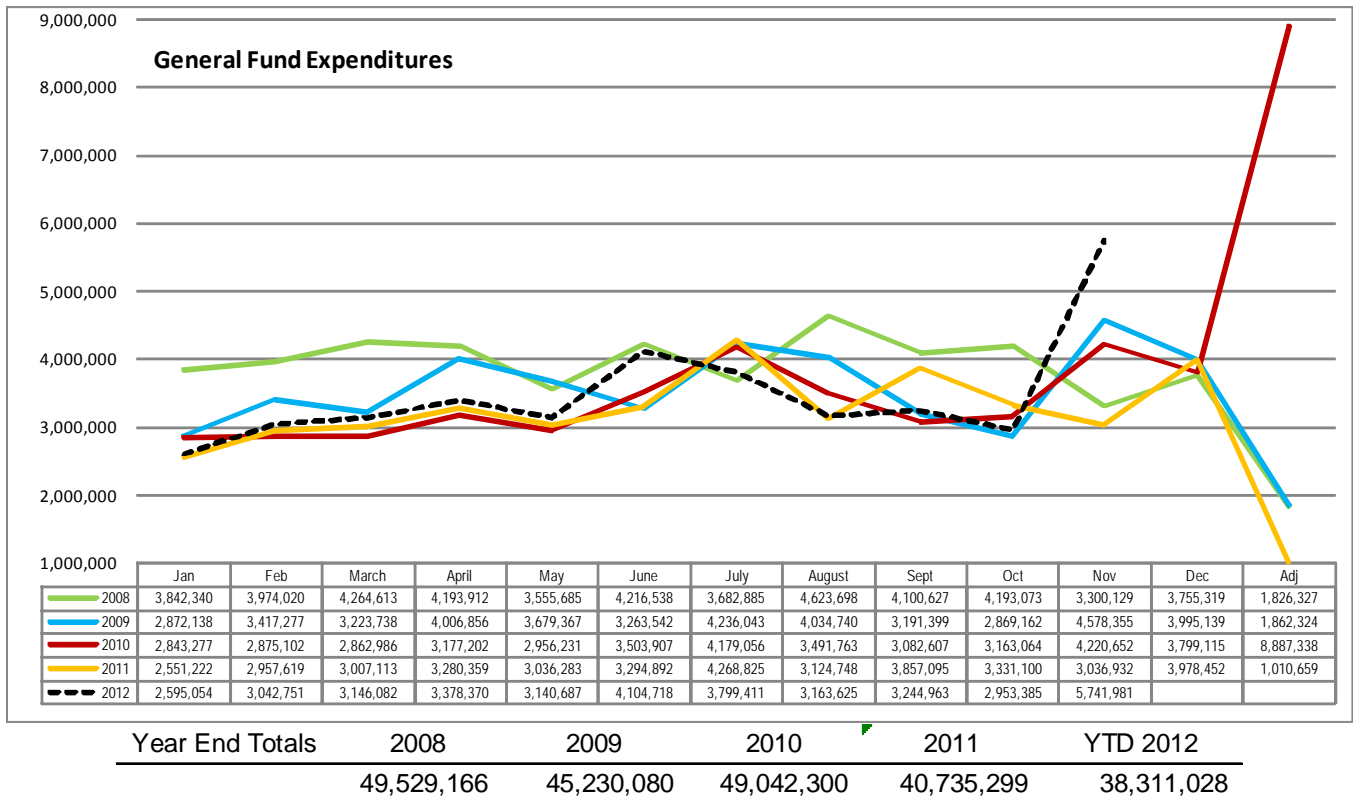

General Fund expenditures that have seen notable growth from Fiscal Year 2011 include:

Expenditure	FY 2011	FY 2012	Increase	% Growth
61067 TRANSFER TO GEN OBL DEBT	0	1,486,226	1,486,226	-

General Fund Expenditures (Adjusted)

The General Fund is the main operating fund within Peoria County. General Fund expenditures will vary each year and the same expenditures do not always occur in the same exact period each year. These figures must be analyzed in conjunction with General Fund revenues and General Fund cash flow to gain a better appreciation of the information.

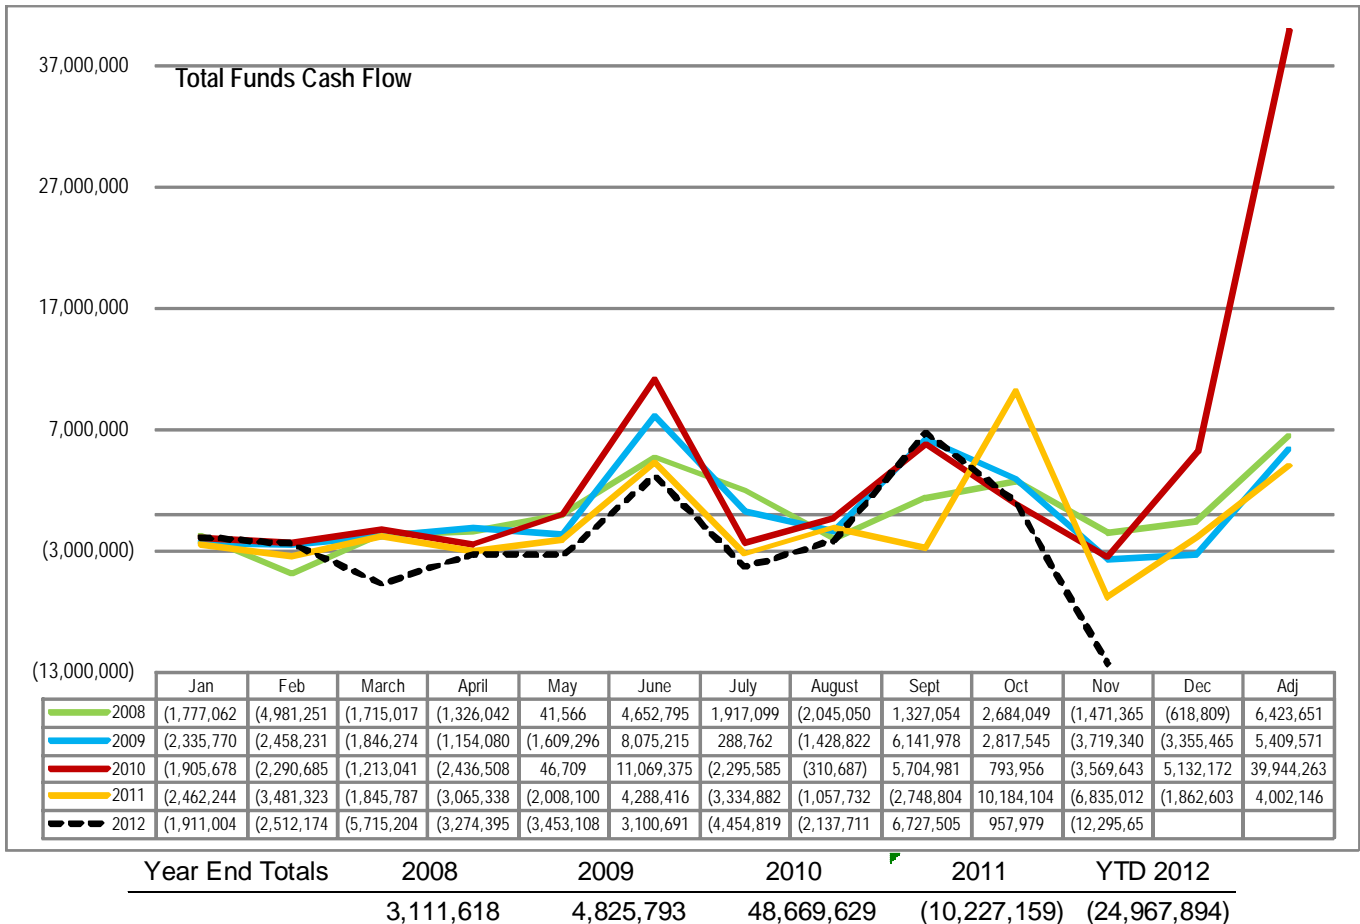

The following charts represent General Fund expenditures divided into operating (personnel, contractual services, commodities, and transfers) and non-operating (capital, debt service). The utilization of the General Fund as the source of capital funding and debt service was common prior to the creation of segregated funds to allow for these functions. Some transfers still take place from this fund as its revenues may be earmarked as funding sources for debt service or various constructions projects. Through November 30, 2012, this total is \$38,311,028, an increase of \$2,666,607 (+7.5%) from this time last year in 2011.

Total Fund Cash Flow

The cash flow FY 2012 for all funds is (\$24,967,894) for the year to date as of November 30, 2012. This is \$12,601,193 more than the cash burn at this time in FY 2011. While negative cash flow is occurring, this is expected due to construction of large-scale capital projects that were funded through bond proceeds in FY 2010 and FY 2011 which are drawing down on the County's assets. These bond issues accounted for the \$48,669,629 in positive cash flow in FY 2010. This large influx of revenue was attributed to the issuance of debt relating to the Riverfront Museum, criminal justice software, and the guaranteed energy savings projects. Contributions and grants, principal on bond payments, building improvements, building construction and bridges and culverts combined result in an increase of \$11,701,638 over November 2011. These five categories are responsible for 87.1% of the increase in FY 2012 overall expenditures.

Additionally, cash flow tends to be negative on an operating basis for most of the County's fiscal year. The months of June and September/October tend to have a sizable positive cash flow due to the collection of property taxes. FY 2012's expenditures have off-set much of the positive gains associated with June property tax revenues, leading to less positive cash flow for the month than is normally expected.

Total fund cash flow will vary each year. Total fund revenues and total fund expenditures need to be included in the analysis when discussing total fund cash flow. Capital projects will impact the outlook on total funds. Other financing sources from the issuance of debt, spending down these proceeds over subsequent years, and transfers/adjustments related to capital projects that took place in previous fiscal years can distort the information in this analysis. However, it is still important to know the "big picture" in terms of the County's overall use of funding (including proceeds from previous bond issues). The above chart is able to give a snapshot of this information.

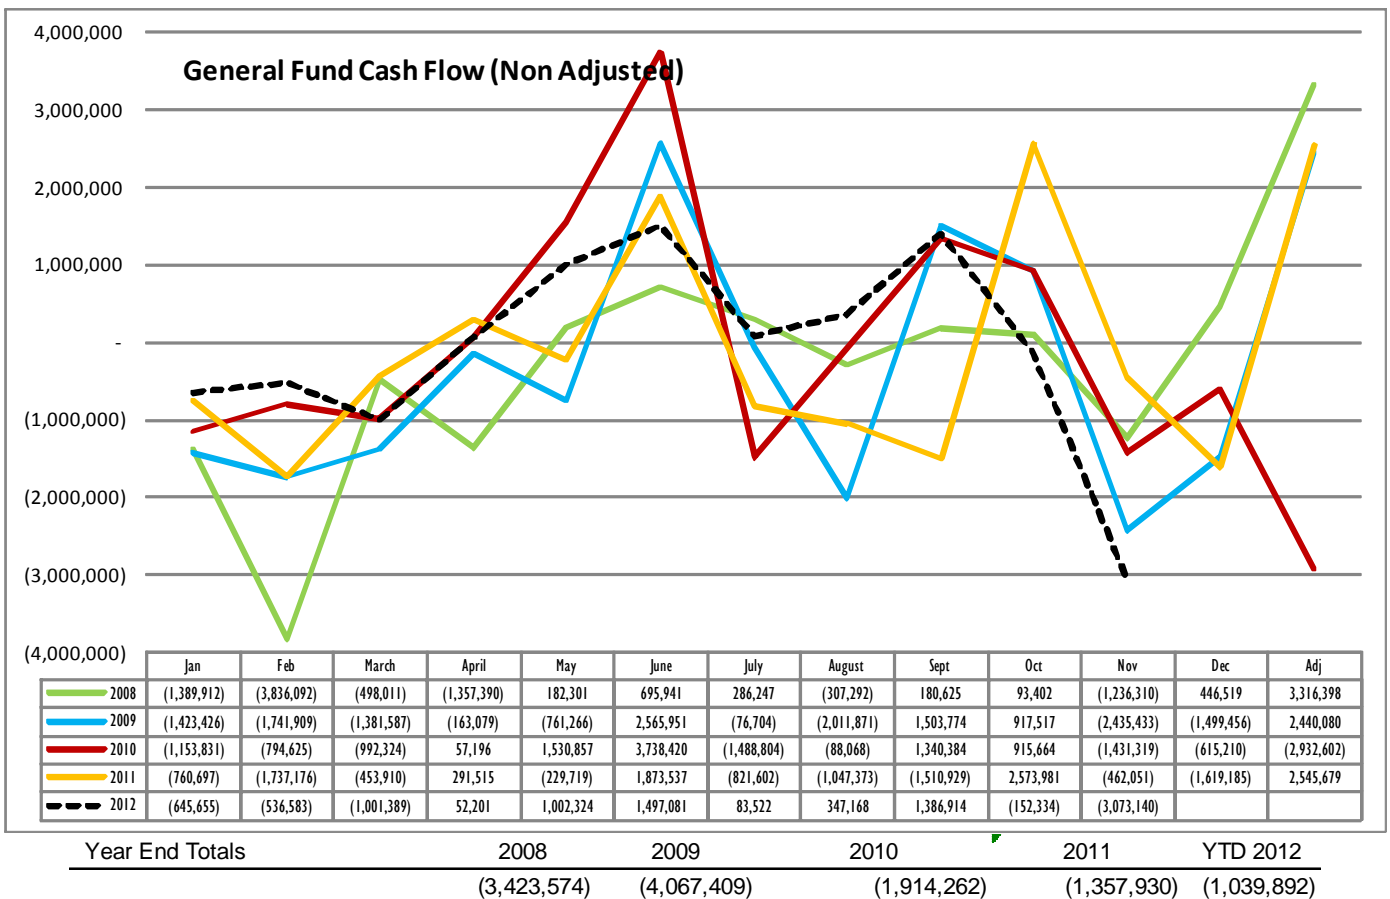

General Fund Cash Flow

As of November 30, 2012, the General Fund has a negative cash flow of (\$1,039,892). Last year at this time it was down (\$2,284,424). This is \$1,244,532 (or 54.5%) less than last year. Cash flow tends to be negative in most months and spike in the months when property taxes are collected (June, September/October).

The following chart presents all General Fund revenue less all General Fund expenditures. This includes operating expenditures such as personnel costs, commodities, and contractual services. However, it also includes capital expenditures, transfers, and debt service. These items were part of the General Fund budget in past years, but have all but disappeared since FY 2011 due to the creation of debt service and capital project funds.

A breakout of the spending trends of both operating and non-operating expenditures is found in the General Fund Expenditures section of this report.

The next page demonstrates the history of the General Fund cash flow when only operating expenses, namely personnel costs, commodities, contractual service, and transfers, are examined.

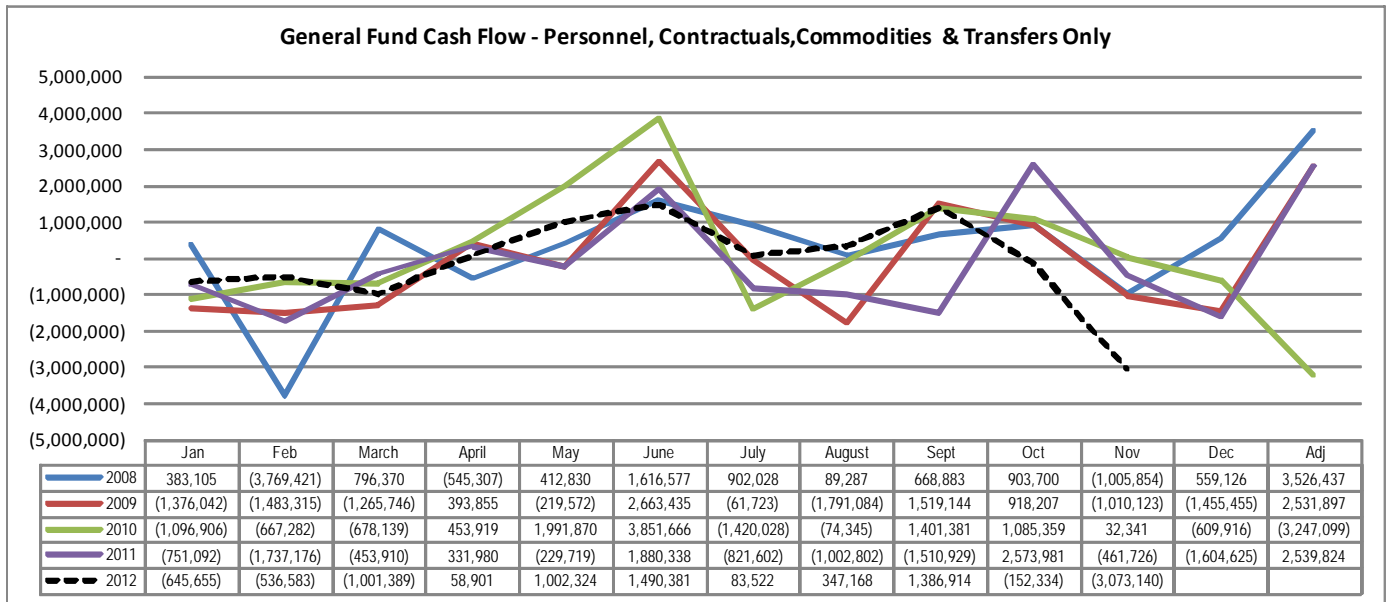

General Fund Cash Flow

The following chart shows the General Fund cash flow when only personnel, contractual services, commodities, and transfers are examined in conjunction with General Fund revenues for each month from January 2008 to November 2012.

When removing capital expenditures and debt service, the cash flow through November 2012 is (\$1,039,892). This amount was (\$2,182,657) at this time last year. The FY 2012 figure represents a difference of \$1,142,765 from time last year. General Fund expenditures declined slightly and revenues are up significantly due to a change in accounting procedures. Much of this money will be transferred out to cover debt costs.

Changes in accounting procedures, timing of payments received, timing of invoices paid, and other issues can skew month-to-month comparisons when comparing fiscal years. While any differences often balance out over a period of months, this data should be analyzed cumulatively throughout the year as opposed to fixating on any particular month.

Looking at past years, it is obvious the source of funding for capital projects in particular was the General Fund. Now that these have been moved to other funds, the cash flow should be \$0 under normal circumstances unless it was specifically planned to draw on the fund balance (as was in the case in the FY 2011 budget). The use of shared savings out of the General Fund is an unbudgeted expenditure that will also reduce cash flow.

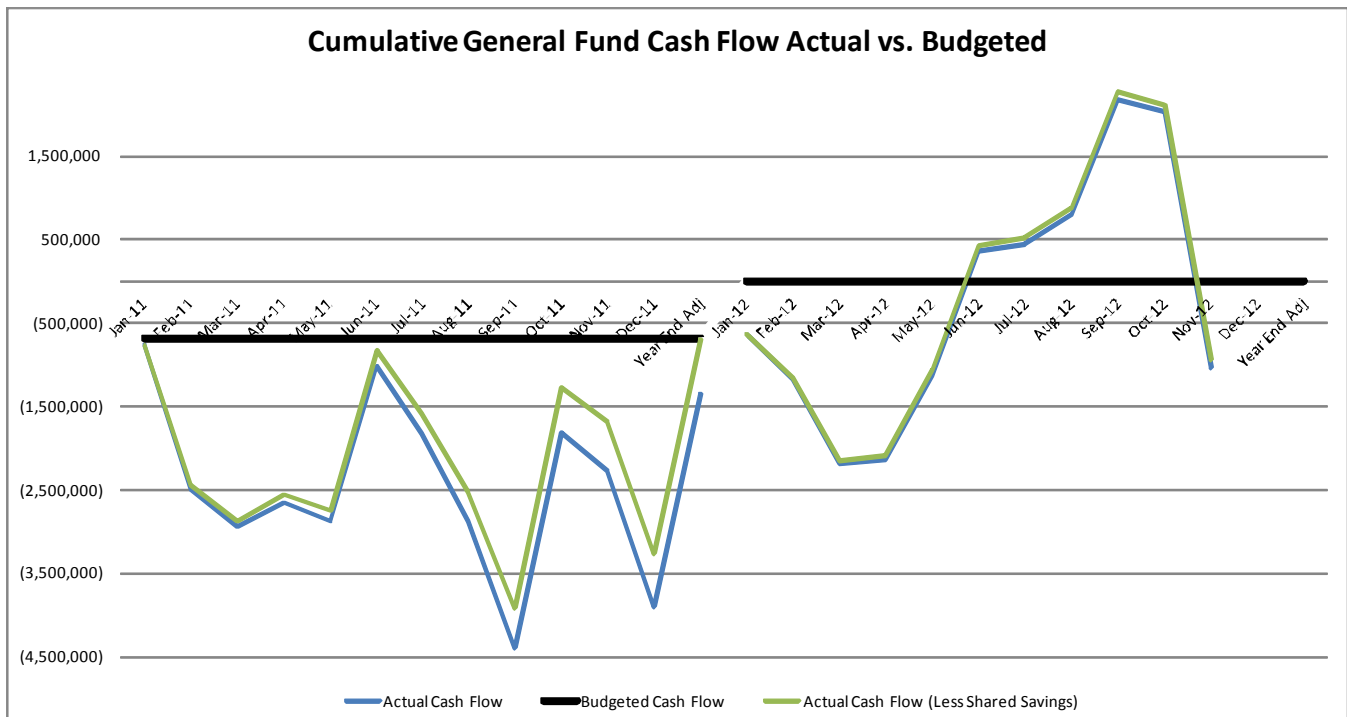

General Fund Cash Flow

The following chart illustrates the cumulative General Fund cash flow between actual values and the budgeted General Fund cash flow.

January 2011 is the starting point since it is the first fiscal year where both debt service and capital expenditures are removed from the General Fund. The FY 2011 budget had planned to use \$678,907 of reserves to still be in compliance with the County's reserve policies. At the end of FY 2011, there was a total cash burn of \$1,357,930 in the General Fund. The amount was \$679,023 more than was planned in the budget process. However, it should be noted that \$651,247 of this amount (96%) is attributed to shared savings expenditures. Shared savings expenditures are not part of the adopted budget. The amount of negative cash flow beyond the budgeted amount and excluding shared savings is only (\$27,776).

Through November 2012, there is a negative cash flow of (\$1,039,892). As noted several times during the year, a transfer would take place in the fourth quarter from the General Fund for debt service. In November 2012, \$1,486,226 was transferred in relation to the December 15th bond payments.

For comparison purposes, the cumulative cash burn through November 2011 was (\$2,284,424). This amount is \$1,244,532 less than this time last year. It is anticipated that this trend will continue into December 2012. However, a period of year-end adjustments will take place to adjust for accrued revenues and expenditures. This traditionally is beneficial towards the balance of the fund, with an exception taking place in 2010 when bonds were issued at the end of the year. This is demonstrated for FY 2011 in the graph below.

	<u>FY 2011</u>	<u>YTD 2012</u>		<u>FY 2011</u>	<u>YTD 2012</u>
Budgeted Cash Flow	(678,907)	-			
Actual Cash Flow	(1,357,930)	(1,039,892)	Shared Savings Expense	651,247	101,167
Deficit Beyond Budgeted Amount	(679,023)	(1,039,892)	Deficit Less Shared Savings Expense	(27,776)	(938,725)
