This page (inside front cover) was blank.

Our Mission:

It is the mission of the Peoria City/County Health Department to assure access to acceptable and appropriate health care for each citizen of Peoria County as well as to provide services to protect the public's health and to enhance the quality and quantity of human life through health education, health promotion, and preventive health services. Within its available resources, the Department will provide those services which are mandated to it; or can best be provided by it because of its unique position as a unit of government; or are necessary to fulfill an unmet community health need.

Our Vision

Identify community health needs and seek opportunities to develop collaborative partnerships with the community and other health care providers to assure access to services, and through educational efforts, regulatory authority, and public policy, improve and protect the quality of life of our community

Director, Dental Health Group

Dear Citizens of Peoria County:

On behalf of the Peoria City/County Health Department, I would like to introduce myself. I have been a member of the Board of Health for eight years, elected Board President in 2003. I am excited about learning the different types of diseases and treatment options that affect our community. I have been provided with literature and other pamphlets to help educate the community on these effects.

With the assistance of our Administrator/Director, Andrea Parker, we have been able to utilize many of the health services available to our community. She is also on hand to answer any questions that might arise. As board members, we work together as a team to get pertinent issues resolved.

I am currently working on a campaign to help people quit smoking. We also have a Smoking Cessation program available with literature for those interested in learning about the dangers of smoking and what they can do to stop.

I look forward to the many workshops offered, so I can learn more about the health programs that are available and what I can do to educate my community on what the Health Department has to offer.

Respectfully Yours,

A handwritten signature in cursive script that reads "Cartheda Welch".

Cartheda Welch
President, Board of Health

Dear Citizens of Peoria County:

It gives me great pleasure to provide you with the information in this 2004 annual report. Our accomplishments include the promoting of Curt Fenton, MS, RN and Wanda Aberle, MS, RN to the directors of nursing positions. Their talent and tenure here at the agency will continue to demonstrate their commitment to public health and the people that we serve. We hired our first Emergency Preparedness Coordinator, Jason Marks, former public health sanitarian. He has quickly assumed the role and is off to an excellent start to address the preparedness initiatives that affect our staff and this community. We have continued to attract quality registered nurses, health inspectors, health educators and other healthcare related staff to the organization through our recruitment efforts.

One of our biggest challenges this year was the distribution of the flu vaccine. Once we learned of the potential vaccine shortage, we promptly convened a community coalition which included the Tri-County Hospitals and Local Health Departments and began counting and planning for the effective use of existing vaccines. We used the CDC's recommended guidelines for the selection of our high risk population which focused our distribution efforts. By year end 2004 this community saw little to no severely diagnosed flu stricken residents and no deaths. And by the end of December, our planning included the lifting of the strict vaccine distribution guidelines which allowed for more people to get vaccinated.

We initiated the IPLAN (Illinois Project for Local Assessment of Needs) which is a community health needs assessment and planning process. The commitment and involvement of the community health partners has been terrific. Our employee union, AFSCME Local 3665, signed a new three year contract.

We plan and continue to promote health, prevent disease, and injury for this community through surveillance efforts, policy development, and assurance that your health and safety needs are being addressed.

Andrea Parker, MS, RN, CPHA
Director of Health

Strategic Planning

The Peoria City/County Health Department has been operating under the original Strategic Plan for the last nine years. For the last two of these years, agency leadership has revisited the Strategic Plan's outcome objectives and recognized that although there have been accomplishments towards the objectives, that the time has come to renew our focus for the future of the agency and the public health services that we provide. We decided in 2004 to direct our attention and energy to the IPLAN to fulfill our role in the public health system of assurance that our citizens have access to services, public policy development to improve, and protect the quality of life in this community. Our agency will again focus on a new Strategic Plan in 2005.

Essential Public Health Services

The following are the 10 essential public health services that provide the foundation of public health programming throughout the country.

- Monitor health status to identify community health problems
- Diagnose and investigate health problems and health hazards in the community
- Inform, educate, and empower people about health issues
- Mobilize community partnerships to identify and solve health problems
- Develop policies and plans that support individual and community health efforts
- Enforce laws and regulations that protect health and ensure safety
- Link people to needed personal health services and assure the provision of health care when otherwise unavailable
- Assure a competent public health and personal health care workforce
- Evaluate effectiveness, accessibility, and quality of personal and population-based health services
- Research for new insights and innovative solutions to health problems

Finance and Human Resource Groups

The operational administration of the department involves management oversight of the various groups, programs and activities as well as provision of internal services. Internal services provided by the Human Resources Group include labor relations, payroll and personnel functions and facilities management. The Financial Services Group directs budget and financial management, purchasing, central supplies and switchboard. Both Groups work closely with the Board of Health, County Administration and various departments within the County, as well as leadership within State agencies.

This year the Health Department has continued to see flat funding or minimal increases in our grant funding. Additionally, the proposed 2005 budget includes a reduction in the tax levy, decreasing the expected property tax revenue to the Health Department by \$189,235. This reduction will necessitate constant monitoring of the agency budget to ensure that the Health Department continues to meet the public health needs of the County of Peoria for which we are responsible.

Three Core Functions of Government in Public Health

The Institute of Medicine report, *The Future of Public Health*, extensively discussed the three core functions of government in public health: 1. Needs assessment; 2. Policy development; 3. Assurance.

These three functions relate to the critical activities of problem solving in the public health field. The major phases of problem solving include the identification of problems, the mobilization of necessary effort and resources and, finally, the assurance that vital conditions are in place and that critical services are provided.

1. **Needs assessment** involves all activities related to community diagnosis: surveillance, identification of needs, analysis of the causes of problems, collection and interpretation of data, case-finding, monitoring and forecasting trends, research, and the evaluation of outcomes.
2. **Policy development** is a complex process that fosters interaction and consensus among a wide range of public and private organizations and individuals. It is through policy that society makes decisions about problems, chooses goals and the proper means to reach them, handles conflicting points of view about ways to address problems and, finally, allocates resources. Government provides guidance in this process.
3. **Assurance relates** to implementing legislative mandates and maintaining statutory responsibility. It is critical that mechanisms be in place to guarantee that necessary services are provided to meet agreed upon goals. Assurance includes regulation of services and products provided in both the public and private sectors, accountability to people setting health objectives and providing reports on progress, and developing adequate responses to health crises. The assurance function requires the exercise of authority. It also provides the guarantee for certain health services.

Peoria City/County Health Department Work Force Analysis:

It is the overall objective of this department to employ a work force which can effectively and efficiently deal with public health problems and which reasonably reflects the composition of the population of the County of Peoria.

The female population of Peoria County is 51.9%*. Of the Health Department employees, 88.7%** are female. The minority population of Peoria County is 20.6%*. Of Health Department employees**, 14.5% are minorities. This is slightly lower than last year's 15.9% figure.

*Based on 2000 Census data

Total	124	12	2	94	16
Percentage		9.7%	1.6%	75.8%	12.9%

Dental Group

Dental services were delivered to widely divergent populations in 2004 through collaborative efforts. Some areas where services were provided include: 62 county schools, Heartland Community Health Center, St. Francis Clinic, Bel-Wood Nursing Home, Peoria Association of Retarded Citizens (PARC), Youth Farm, Children’s Home, Allied Agencies and Head Start School Programs. In addition to these unique groups in our community, HIV-positive patients, patients with hemophilia, and inmates at the Peoria County jail were seen throughout the year.

The demand for low-income/medical card dental services continues to increase yearly. Because reimbursement rates remain inadequate for Medicaid dental services, the clinic is providing dental services for select adult populations only (i.e. Developmentally Disabled, HIV, Heartland and Mother Francis Krasse Clinics to name some of the populations). The Volunteer Dental Clinic at Allied Agencies continues to provide dental services for the uninsured.

A new donated software program in the Dental Clinic facilitates an improved method of identifying community based oral health needs of children. The children’s clinic continues to provide preventative and comprehensive care to children unable to find a dentist due to the family’s inability to pay or because

of their Public Aid status (which reimburses dentists at a low rate – “overhead” expenses are not reimbursed adequately). Despite continued contributions by the Peoria District Dental Society members, it is difficult to keep pace with the rising demand for dental services. Peoria County is fortunate to have several volunteer dentists treating low-income/public aid patients. (Most central Illinois counties have only 0-1 dentists volunteering to treat these populations.)

Dental services also include exams, cleaning, fluoride, sealants and referrals for needed care to children in various school settings. The numbers in the dental statistics section reflect a total of all services provided to all populations throughout the Dental community.

Community Dental Health Statistics

	<i>2004</i>	<i>2003</i>
Examinations	27,080	26,500
Sealants	19,300	18,500
Classroom Presentations (Children Served)	4,500	4,500
Other Dental Services	54,900	50,100

Environmental Health Group

The Environmental Health Group works to ensure the health of the residents of Peoria County by conducting inspections, permitting, providing education and responding to complaints in several programs. These programs include: Food Protection, Water Protection, Private Sewage Disposal System Design, Childhood Lead Poisoning Prevention, Tanning Salon Inspections, Vector Control, Housing and Nuisance Complaints.

Food Protection Program:

The Environmental Health staff provides services to the community in the food protection program by reviewing plans for proposed food service facilities, licensing these facilities and conducting inspections. In addition, substantial time is spent educating the public on food safety sanitation by way of classes taught at the Health Department and presentations given throughout the County.

<i>Food Program Inspections</i>	2004
Food Protection	2,247
Temporary Food Stands	785

<i>Pushcart Inspections</i>	2004
Total Inspections	120

Total Major Violations Found and Corrected Food Facility Inspections:2,116

<i>Compliance Actions</i>	2004
Conferences	13
Hearings	0
Voluntary Closures	2

Food Certification Classes:

Total # of classes/attendees 8/300

Food Certification Refresher Classes:

Total # of classes/attendees 8/204

Pre-Operational Food Service Classes:

Total # of classes/attendees 17/36

Water Protection Program:

The Environmental Health staff provides services to the community in the water protection program by working to ensure private, semi-private and non-community public water supplies (such as wells providing water to schools and restaurants) provide clean, safe water. Water wells are permitted, inspected and sampled.

<i>Inspections</i>	2004
Private & Semi-Private Water Wells:	200
Non-Community Public Water Supply:	105
Private & Semi-Private Water Wells –Loan Approvals.....	64

Private Sewage Disposal System Program:

The Environmental Health staff provides services to the community in the PSDS Program by ensuring that these systems are permitted, constructed and operated correctly.

<i>Inspections</i>	2004
Private Sewage Systems:	659
Private Sewage Pumping Trucks:	13
PSDS Systems – Loan Approvals:	188

Childhood Lead Poisoning Prevention Program:

The Environmental Health staff provides services to the community in the CLPPP by conducting lead risk assessments on homes occupied by children with elevated blood lead levels and ensuring that these homes are made lead safe.

<i>Inspections</i>	2004
Lead Risk Assessments:	53
Homes Mitigated.....	48

Tanning Salon Inspections:

The EH staff provides services to the community in the Tanning Salon Inspection Program by conducting inspections to ensure that tanning salons are safe, sanitary and operated in a safe manner.

Tanning Salon Inspections:	44
----------------------------------	----

Vector Control Program:

The EH staff provides services to the community in the Vector Control Program by providing education on mosquito control and West Nile Virus, as well as conducting active surveillance through mosquito testing and bird testing. In addition, this group employs a full-time person for the summer months to investigate vector complaints and conduct this program.

Mosquito/West Nile Virus Public Contacts:	190
Mosquito/West Nile Virus Inspections:	119

Housing and Property Maintenance Program:

The EH Group provides services to the community by conducting compliance inspections and follow-up for dwelling units that present unsafe and unhealthy housing conditions.

Housing Inspections:	29
----------------------------	----

Nuisance Control Program:

The EH Group provides services to the community through the Nuisance Control Program by investigating complaints such as rodent control and solid waste disposal.

<i>Nuisance Control Inspections</i>	2004
Rodent Control:	15
Solid Waste:	19
General Nuisance Control:	14

Subdivision Reviews:

The EH Group works in conjunction with other county agencies to assess new subdivision plans for future development sites with regard to issues such as proper sewage disposal and water.

New Subdivisions Reviewed:.....	18
New Subdivisions Approved:	13

Health Promotion and Epidemiology Group

- Encourages healthy lifestyle choices and to assist individuals to effectively manage behavior change through awareness and educational efforts.
- Conducts health data analysis and develops community needs assessment to identify public health problems in the community.

Programs and Services

Health Break Program

- Provides various school health education programs to reinforce health curriculum for Peoria County students grades K-12.

	2004	2003
Total number of presentations given:	304	266
Total number of children served:	8,785	5,266

Speaker's Bureau/Community Fairs

- Provides quality health education presentations on numerous health topics as requested by social service agencies and community groups.

	2004	2003
Total number of presentations given:	108	182
Total number of people served:	1,395	2,513

Building Better Bones (Osteoporosis Education and Screening Program)

- Provides osteoporosis education workshops, risk assessments, bone density screenings and follow-up to women aged 65 and older or post-menopausal women under 65 with one or more risk factors.

2004

Number of women who received bone density screenings 75
 Number of women who attended Lunch & Learn workshops ... 50

HIV Consortium/Education

- *Regional Implementation Grant (RIG):* Provides HIV prevention education, outreach, counseling, and testing services to high-risk groups and the general population.
- *HIV Consortium Grant:* Provides essential supportive services to HIV/AIDS clients including, but not limited to, medical care, housing, counseling, information and referral, and case management.

	2004	2003
Consortium clients:	379	363
High-Risk Education clients:	2,300	2,300
Outreach HIV testing clients:	196	104

Tobacco-Free Communities Program

- Provides comprehensive tobacco prevention and control programs in Peoria County in the areas of cessation, youth prevention, environmental tobacco smoke and the reduction of disparities.

a. Freedom from Smoking Program

- Provides a comprehensive tobacco cessation program that uses a positive behavior change approach to teach the participant how to become a non-smoker.

	2004	2003
Number of people served:.....	333	215

Tobacco-Free Communities Program *(continued)*

b. Make Yours a Fresh Start Family Program

- Provides tobacco prevention education and counseling to pregnant and postpartum women who use tobacco products through WIC and Healthy Mom/Healthy Kids (HM/HK) program.

c. Smoke-free Restaurant Recognition Program

- Educates restaurant owners about the benefits of maintaining a smoke-free dining environment and encourages them to adopt a smoke-free policy within their establishments.

<i>2004</i>	<i>2003</i>
Number of smoke free restaurants:	160..... 170

d. The Truth About Smoking (School-based Tobacco Education Program)

- Provides tobacco use prevention education programs to students in grades K-12.

<i>2004</i>	<i>2003</i>
Number of students taught:.....	742.....96
Number of programs taught:	22

Vital Records

- The health department issues, registers, and maintains birth certificates, death certificates and issues burial permits.

<i>2004</i>	<i>2003</i>
Total Births:	2,633*..... 2,602 ¹
Total Deaths:	1,595*..... 1,659*
Infant Deaths:	29*..... 22*

**PCCHD provisional data
¹revised data from IDPH*

IPLAN (Illinois Project for Local Assessment of Needs) Community Needs Assessment Process

The Illinois Project for Local Assessment of Needs (IPLAN) is a community health needs assessment and planning process that is conducted every five years by local health jurisdictions in Illinois. The completion of IPLAN fulfills most of the requirements for Local Health Department certification. The Peoria City/County Health Department has initiated its third IPLAN cycle in September, 2004 using the APEXPH (Protocol for Excellence in Public Health) model. The first step of the process was to conduct an organizational capacity assessment to identify the strengths and weaknesses of the health department and whether the health department has the capacity to conduct the IPLAN process. The IPLAN community health planning committee was formed with various community leaders who were interested in identifying top health problems in the community and finding the solutions to address them. The IPLAN committee met several times in 2004 to examine and prioritize various health data listed in seven categories such as demographic information, access to care, maternal and child health, chronic disease, infectious disease, environmental/occupational/injury control, and sentinel events. The final outcome of the IPLAN process is the development of a community health plan that addresses the three top health priorities in Peoria County and their related risk factors and contributing factors. In addition, the community health plan includes long and short-term goals, objectives, barriers and intervention strategies for each health problem to be implemented in the next five years.

Public Health Nursing Group

The Public Health Nursing Group is integrated internally to provide service delivery across disciplines. Nurses, social workers, nutritionists, lab and allied staff provide case management services to vulnerable populations. External partnerships with the community complement and expand our effectiveness in promoting and protecting the community's health.

The Nursing Group continues to lead efforts to prepare our agency and community to respond to natural and man-made emergencies. The Emergency Response Coordinator position was created in 2004 to coordinate planning, training, exercising and evaluation of our capacity to respond.

The following are programs and services provided to Peoria County through the Nursing Group in 2004.

WIC Nutrition Program: The WIC program promotes healthy eating habits to pregnant women, infants, and children under age five. Nutritionists and nurses help pregnant women maintain a healthy weight gain, quit or reduce smoking, and practice healthy behaviors for themselves and their families.

WIC (Caseload Average)4,186

Lead Screening: Children from six months to six years old are screened for lead poisoning. Elevated blood lead levels may require nurse case management and education, and environmental evaluation of homes. New Lead Elimination Grant activities initiated in 2003.

Clients Screened443

MCH Case Management Programs:

Healthy Moms/Healthy Kids is a case management program for at-risk pregnant women, infants and children. Social workers and nurses work to assure that pregnant women receive the earliest possible access to health care and support services.

Healthy Moms/Healthy Kids (Caseload)2,020

Teen Parent Services case managers assist parents under 21 years of age, who have not completed high school or equivalent, to complete their education and improve parenting skills.

Teen Parent Services (Caseload)73

Targeted Intensive Prenatal Case Management is intensive case management that intervenes with pregnant women at highest risk of delivering premature or low birth weight babies.

Average caseload 187

Percent of infant births \geq 5.5 lbs. 84.48%

HealthWorks of Illinois case managers provide medical case management to the wards of the State of Illinois residing in Peoria County.

HealthWorks Lead Agency (6 county network) Wards1,095

HealthWorks Peoria Wards (\leq 6 years of age)285

HealthWorks Peoria Wards (> 6 years of age)461

(continued below)

Immunizations: Immunization/Walk-in, appointment, and community-based clinics provide primary series vaccines and boosters to children and adults. Coordination of public vaccine supply with area physicians maximizes the efficient delivery of vaccines in the community. Foreign Travel provides immunizations for those traveling abroad.

Influenza Immunizations	4,075
Pneumonia Immunizations	43
Foreign Travel Immunizations	3,103
Adult Immunizations.....	2,573
Infant/Child Immunizations.....	5,718

STD Clinic: STD Clinic works to prevent transmission of sexually transmitted diseases by providing confidential screening, diagnostic testing and treatment, as well as epidemiological follow-up of cases and contacts of infected persons.

STD Clinic Attendance	3,706
HIV Counseling & Testing	2,312

Communicable Disease/Tuberculosis Program: The Communicable Disease Program monitors incidence of infectious disease in the community, and initiates control measures and epidemiological follow-up of reported cases and outbreaks. The Tuberculosis Clinic provides TB skin tests, diagnosis, treatment, and epidemiologic and contact investigation.

Clients screened (TB Skin Test & Chest X-Ray)	807
Clients treated preventively.....	27
New active cases treated.....	0

Access to Care: Access to Care provides a link between Peoria City/County Health Department and medical providers to promote the public's health through program information, advocacy, and collaborative problem solving. It develops and maintains provider networks for provision of preventive medical care and health screening to populations at risk.

Vaccines for Children+ (Providers).....	66
Provider Network (Providers)	137
Prostate (Screening)	39
KidCare Applications (Assisted).....	1,035
