The grass seed that was planted along the north side of Dirksen Parkway in June did not grow due to the lack of rain in June and early July. Now that fall is approaching, Peoria County has instructed the contractor to replant the seeding that was installed from Mesa Drive to Airport Road. Fall is the best time for seeding to be established, so we should be able to get a good stand of grass started like was done last fall on the south side of the road.

Today the contractor applied weed killer to kill the weeds prior to re-planting the grass seed. In the coming weeks, the contractor will till the ground and replant the grass seed. Fall is the best time for seeding to be established, so we should be able to get a good stand of grass started like was done last fall on the south side of the road.

Thank you in advance for your patience and cooperation during this project.
