EROSION CONTROL GENERAL NOTES:

1. **Temporary Erosion Control:** The contractor shall install all applicable erosion control measures prior to any site disturbance.

2. **Temporary Fencing:** Temporary fencing, etc. shall be removed and properly treated or disposed.

3. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

4. **Temporary Erosion Control Devices:** The contractor shall be responsible for removing temporary erosion control devices which may collect in or near drainage systems.

5. **Sediment Management:** Sediment shall be removed from stream channels, ditch checks, or any other area where it may collect.

6. **Temporary Erosion Control Systems:** The contractor shall maintain temporary erosion control systems to protect adjacent properties and public areas.

7. **Temporary Waterways:** Temporary waterways shall be protected with appropriate erosion control devices.

8. **Temporary Storage:** Temporary storage areas shall be protected with appropriate erosion control devices.

9. **Temporary Erosion Control Plan:** Any deviation from the temporary erosion control plan or schedule by the contractor shall be at the discretion of the engineer.

10. **Erosion Control Measures:** All erosion control measures shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

11. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

RESTRICTION OF EROSION:

1. **Temporary Erosion Control:** The contractor shall adhere to all terms and conditions as shown on the erosion control plan. Measures shall be taken to minimize erosion and sedimentation.

2. **Temporary Fencing:** Temporary fencing, etc. shall be removed and properly treated or disposed.

3. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

4. **Temporary Erosion Control Devices:** The contractor shall be responsible for removing temporary erosion control devices which may collect in or near drainage systems.

5. **Sediment Management:** Sediment shall be removed from stream channels, ditch checks, or any other area where it may collect.

6. **Temporary Erosion Control Systems:** The contractor shall maintain temporary erosion control systems to protect adjacent properties and public areas.

7. **Temporary Waterways:** Temporary waterways shall be protected with appropriate erosion control devices.

8. **Temporary Storage:** Temporary storage areas shall be protected with appropriate erosion control devices.

9. **Temporary Erosion Control Plan:** Any deviation from the temporary erosion control plan or schedule by the contractor shall be at the discretion of the engineer.

10. **Erosion Control Measures:** All erosion control measures shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

11. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

12. **Temporary Erosion Control Systems:** The contractor shall maintain temporary erosion control systems to protect adjacent properties and public areas.

13. **Temporary Waterways:** Temporary waterways shall be protected with appropriate erosion control devices.

14. **Temporary Storage:** Temporary storage areas shall be protected with appropriate erosion control devices.

15. **Temporary Erosion Control Plan:** Any deviation from the temporary erosion control plan or schedule by the contractor shall be at the discretion of the engineer.

16. **Erosion Control Measures:** All erosion control measures shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

17. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

18. **Temporary Erosion Control Systems:** The contractor shall maintain temporary erosion control systems to protect adjacent properties and public areas.

19. **Temporary Waterways:** Temporary waterways shall be protected with appropriate erosion control devices.

20. **Temporary Storage:** Temporary storage areas shall be protected with appropriate erosion control devices.

21. **Temporary Erosion Control Plan:** Any deviation from the temporary erosion control plan or schedule by the contractor shall be at the discretion of the engineer.

22. **Erosion Control Measures:** All erosion control measures shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

23. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

24. **Temporary Erosion Control Systems:** The contractor shall maintain temporary erosion control systems to protect adjacent properties and public areas.

25. **Temporary Waterways:** Temporary waterways shall be protected with appropriate erosion control devices.

26. **Temporary Storage:** Temporary storage areas shall be protected with appropriate erosion control devices.

27. **Temporary Erosion Control Plan:** Any deviation from the temporary erosion control plan or schedule by the contractor shall be at the discretion of the engineer.

28. **Erosion Control Measures:** All erosion control measures shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

29. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

30. **Temporary Erosion Control Systems:** The contractor shall maintain temporary erosion control systems to protect adjacent properties and public areas.

31. **Temporary Waterways:** Temporary waterways shall be protected with appropriate erosion control devices.

32. **Temporary Storage:** Temporary storage areas shall be protected with appropriate erosion control devices.

33. **Temporary Erosion Control Plan:** Any deviation from the temporary erosion control plan or schedule by the contractor shall be at the discretion of the engineer.

34. **Erosion Control Measures:** All erosion control measures shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

35. **Silt Fence:** Silt fence and erosion control devices shall be constructed in accordance with the plans and specifications. All new areas shall be checked regularly to maintain a healthy stand of grass, areas shall be seeded as required.

36. **Temporary Erosion Control Systems:** The contractor shall maintain temporary erosion control systems to protect adjacent properties and public areas.

37. **Temporary Waterways:** Temporary waterways shall be protected with appropriate erosion control devices.

38. **Temporary Storage:** Temporary storage areas shall be protected with appropriate erosion control devices.
